

# VESARO

The worlds most advanced simulators. Designed, engineered and built in England.

## Introducing the **Vesaro I Modular** simulation system

---

A truly Modular design that allows bespoke customization and a fully upgradable architecture.

The Vesaro system offers a perfect mix of modular flexibility, beautiful stylish design and ultra-stable engineering.

This modular flexibility allows you to start with the core rig and expand the complexity of your setup as you need. The system allows you to build a specific setup to suit your exacting needs, with the option to choose different steering set-ups, 5 different motion options, an advanced Tactile Feedback System, surround sound audio, Seat Belt G-Force Tensioner systems, single, triple, VR displays, multiple control systems and many more.

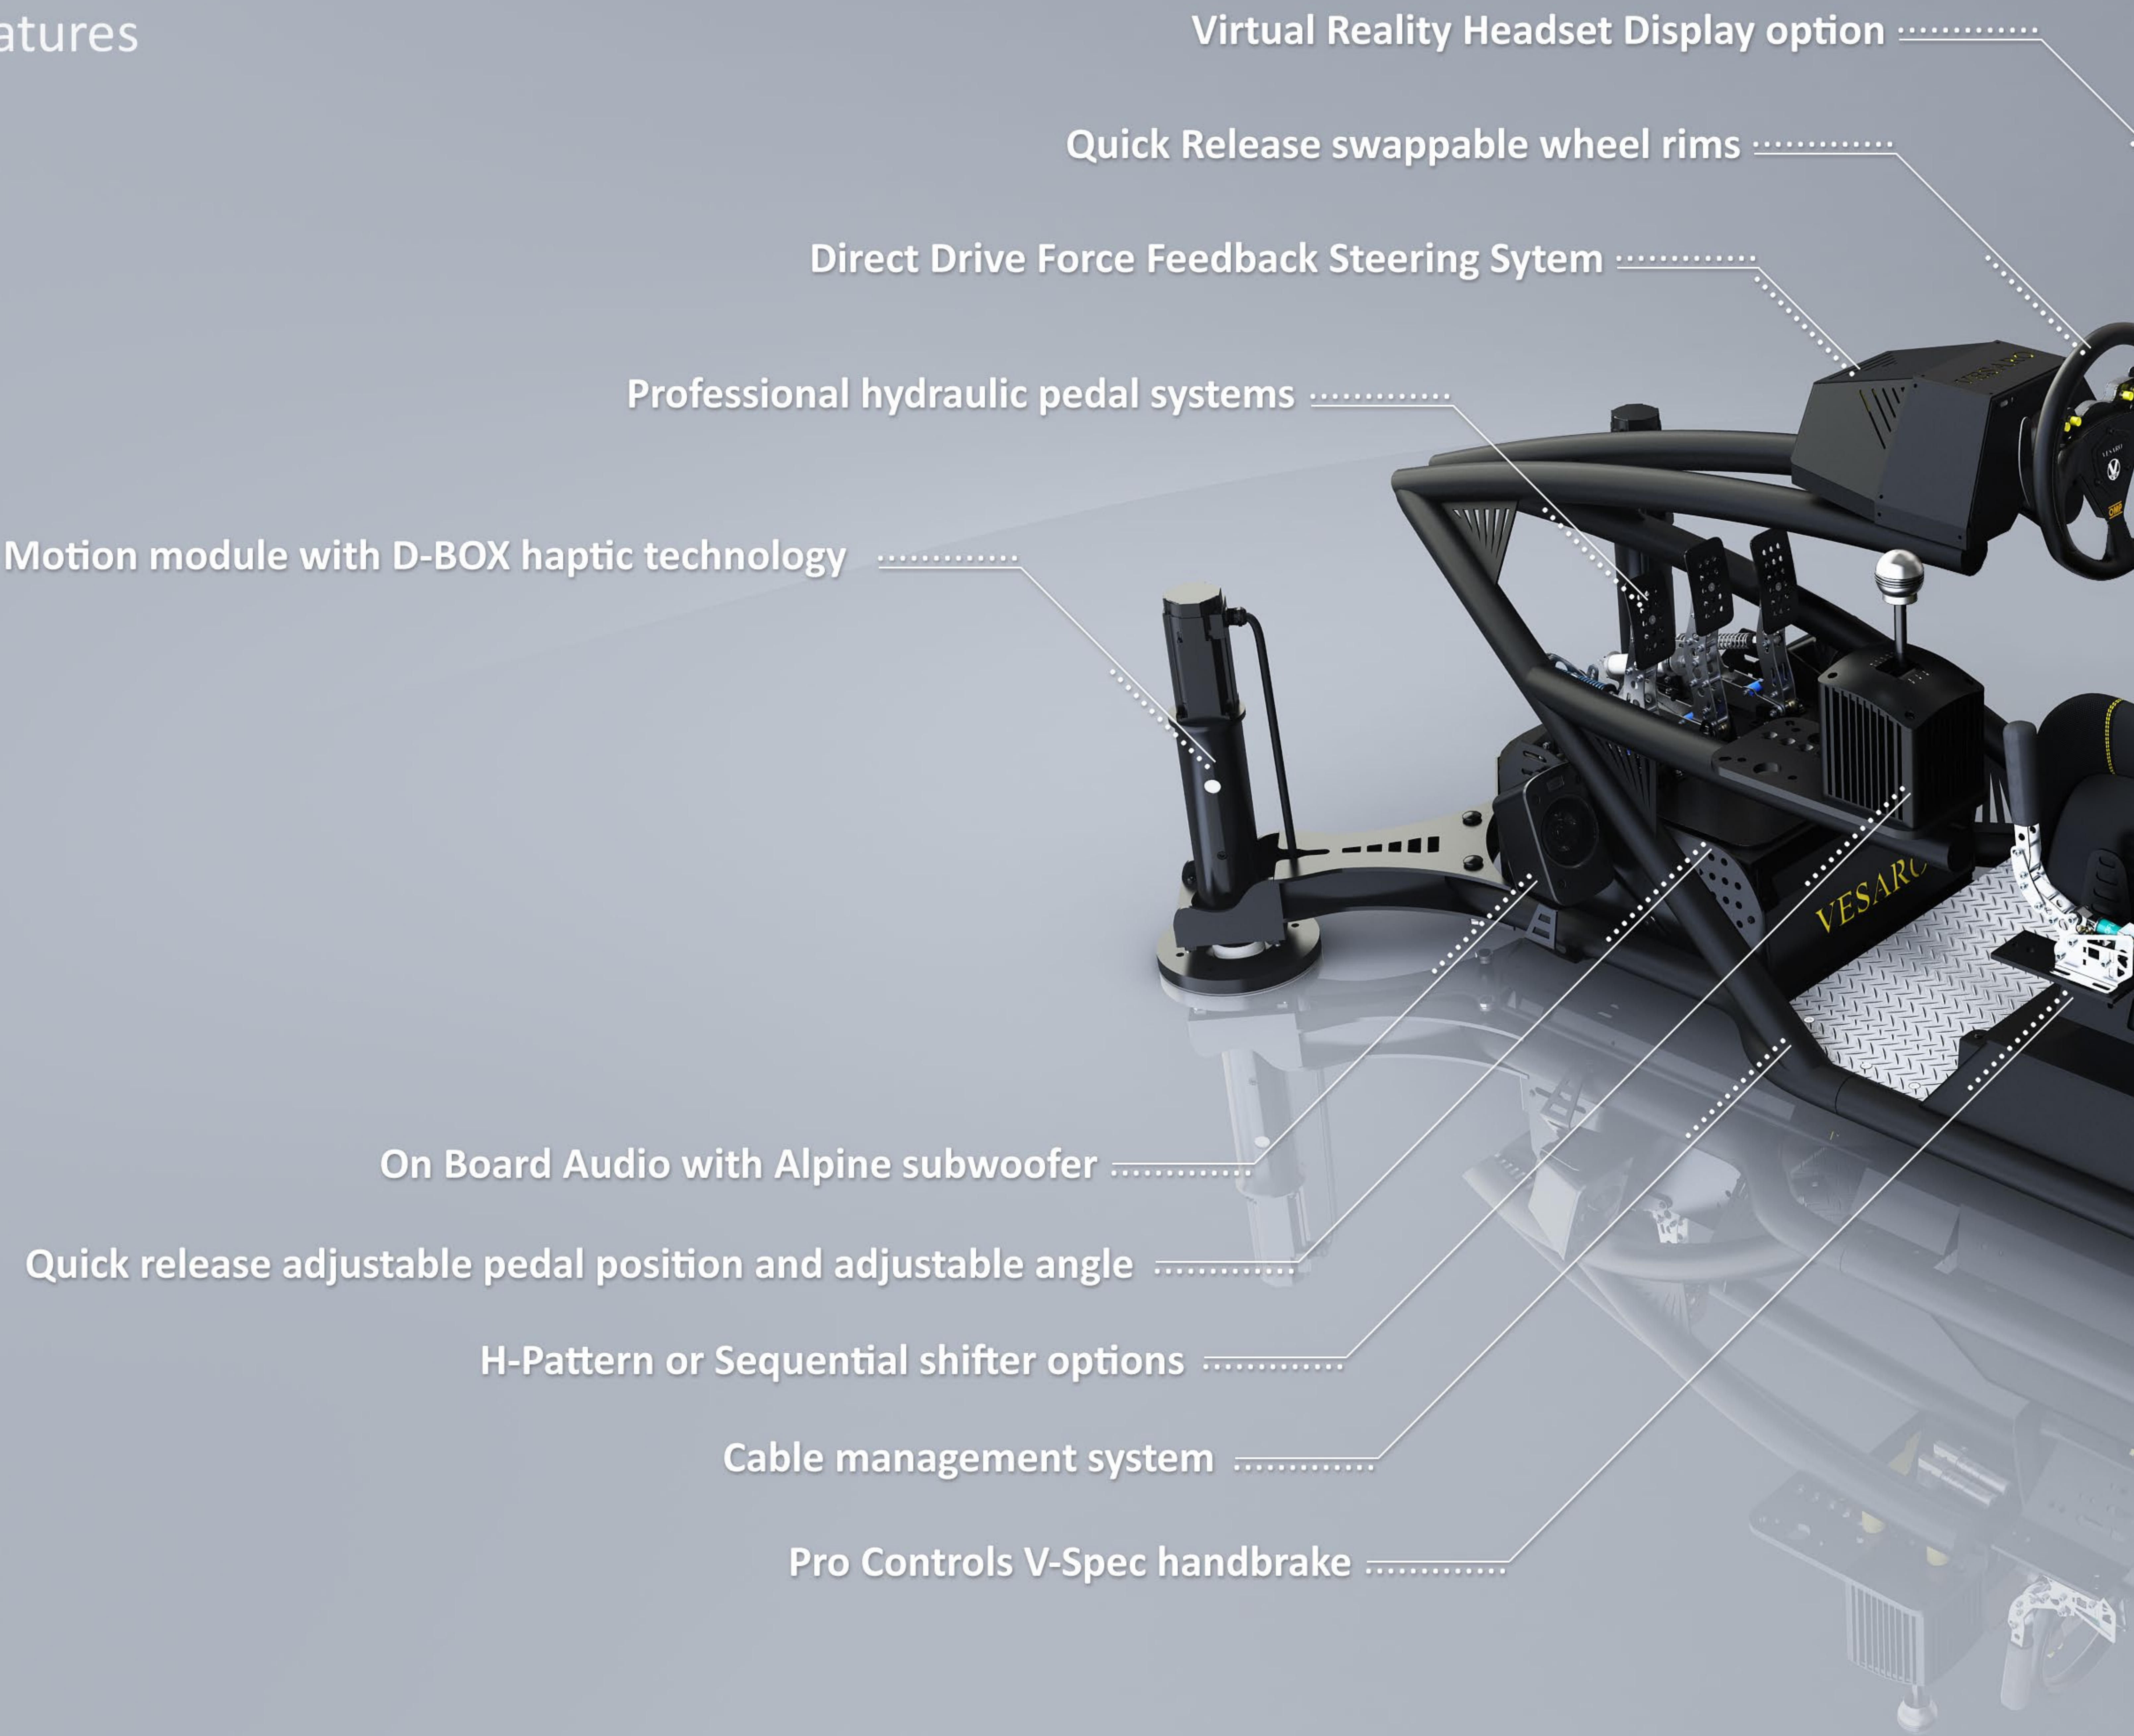

With over 200 modules the Vesaro system is the only truly modular system allowing complete control of your simulator requirements.

# Vesaro I Modular key features

Virtual Reality Headset Display option .....

Quick Release swappable wheel rims .....

Direct Drive Force Feedback Steering Sytem .....

Professional hydraulic pedal systems .....

Motion module with D-BOX haptic technology .....

On Board Audio with Alpine subwoofer .....

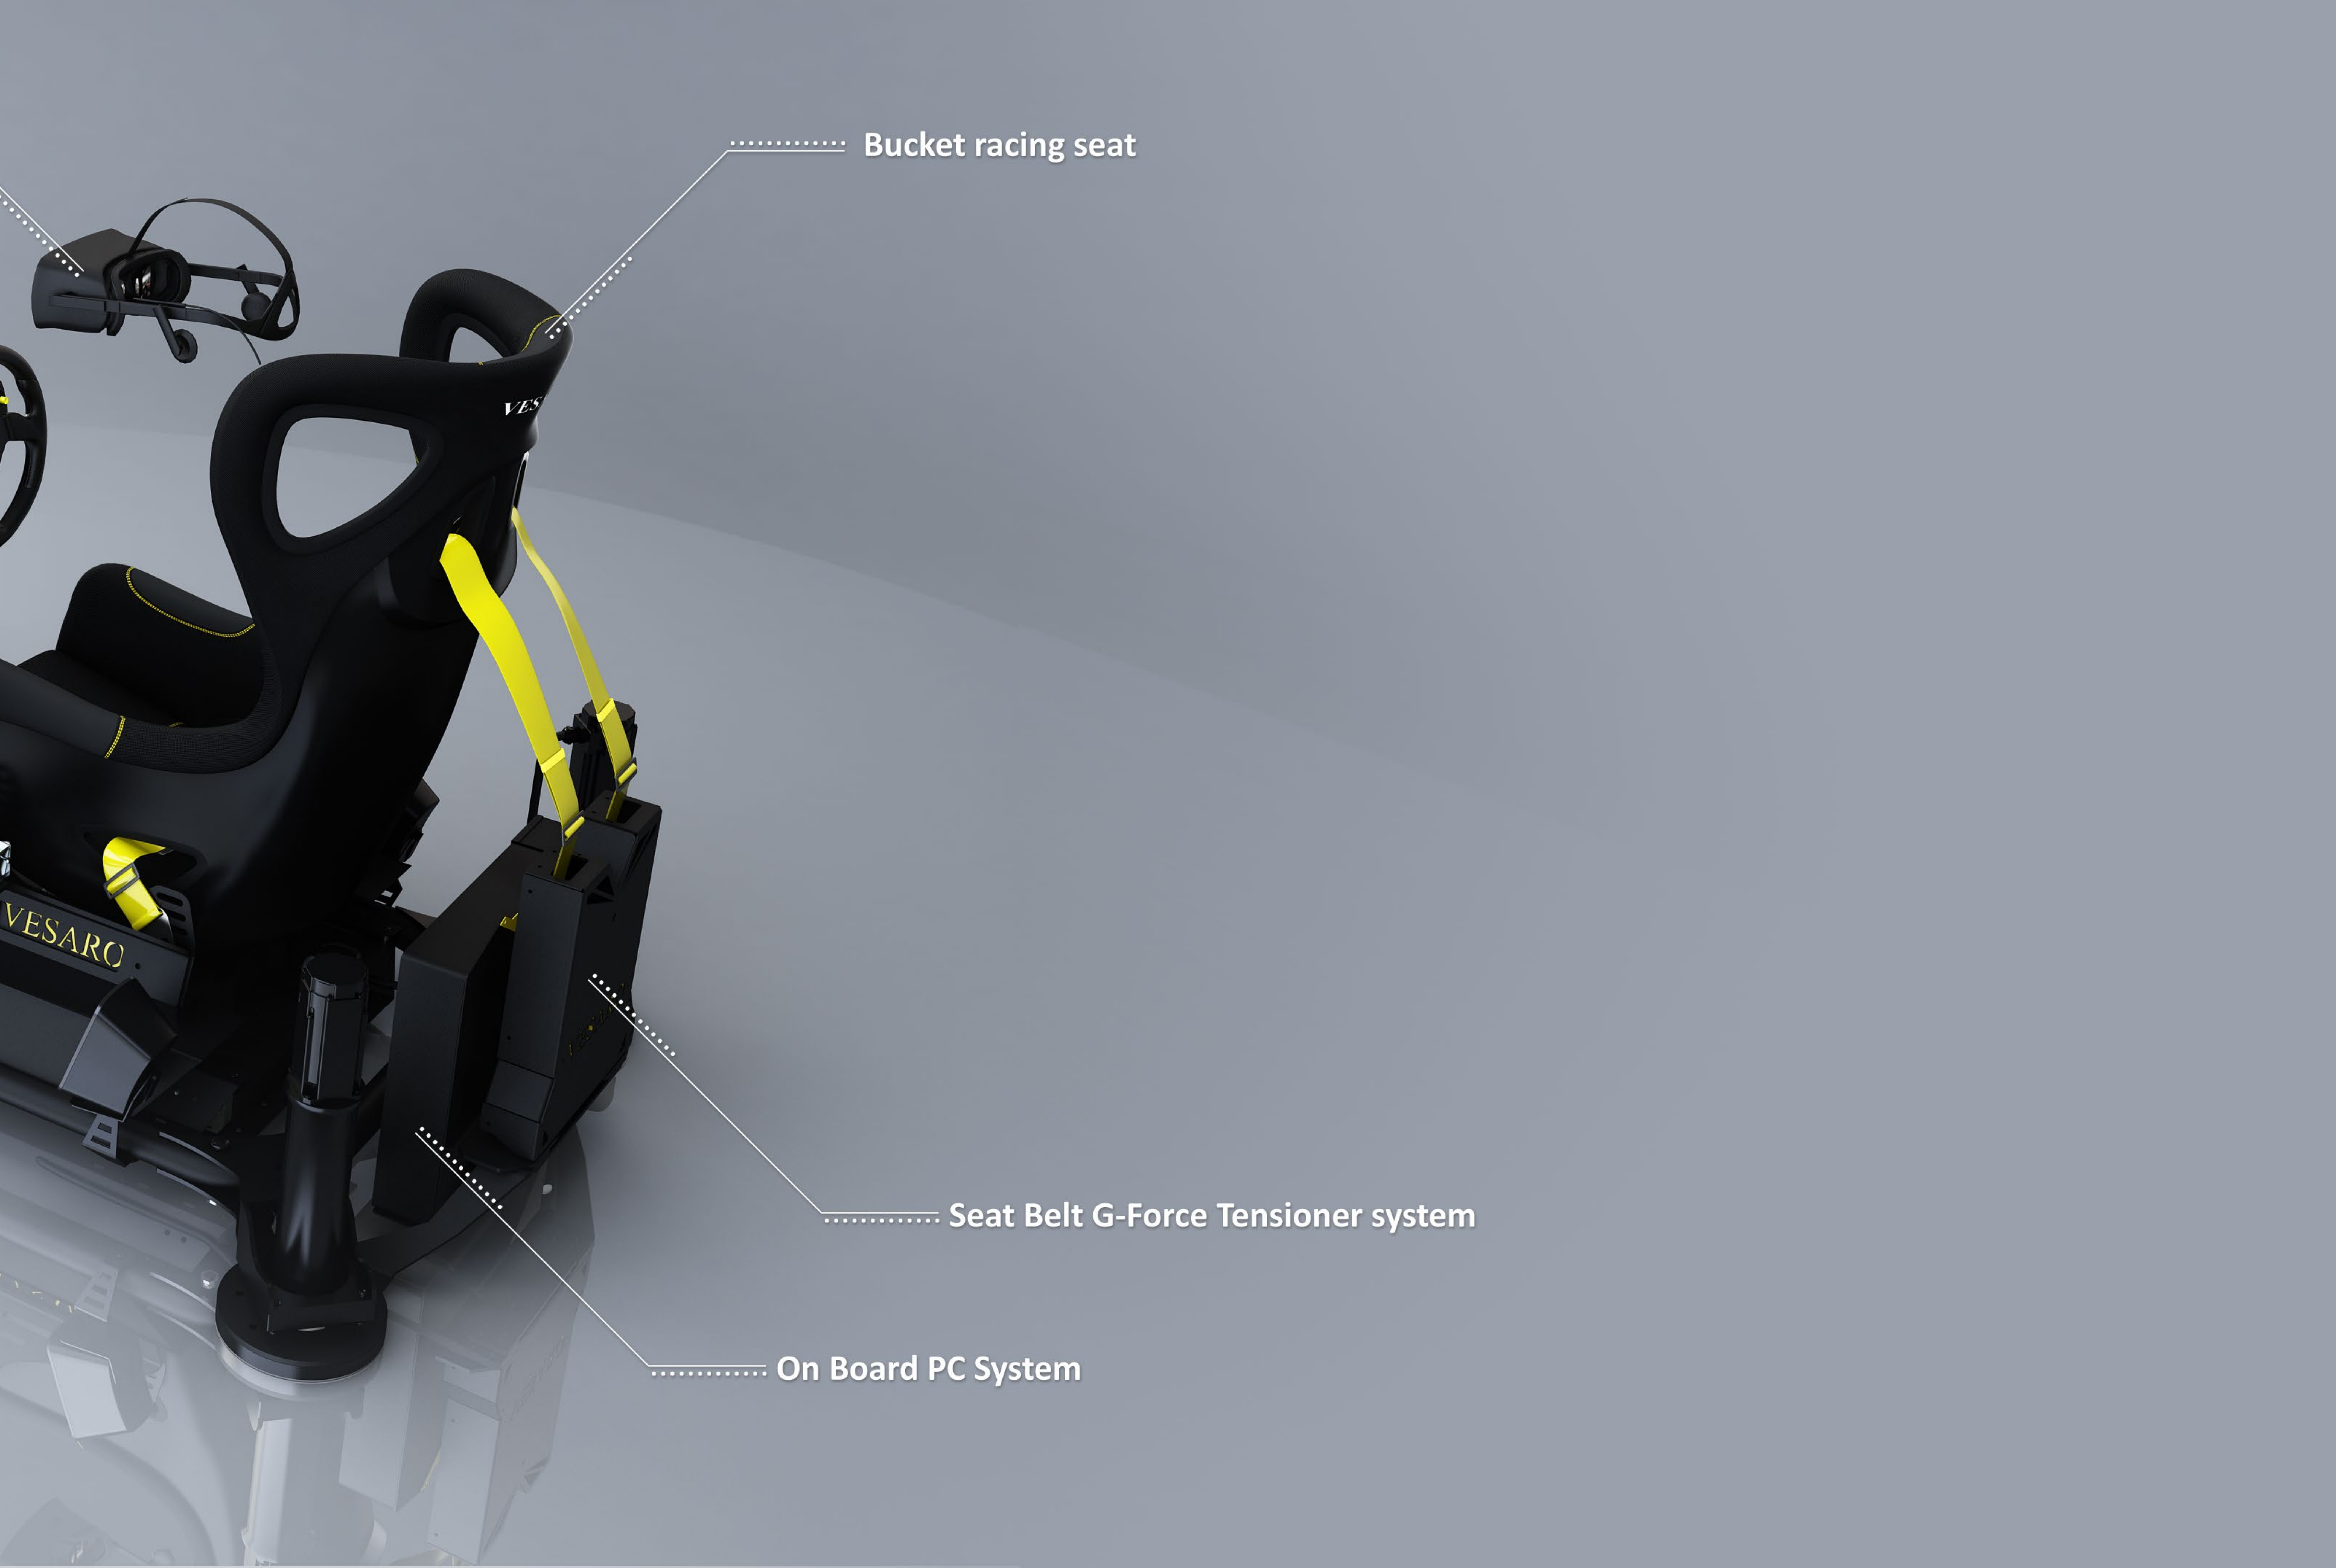

Quick release adjustable pedal position and adjustable angle .....

H-Pattern or Sequential shifter options .....

Cable management system .....

Pro Controls V-Spec handbrake .....

..... Bucket racing seat

..... Seat Belt G-Force Tensioner system

..... On Board PC System

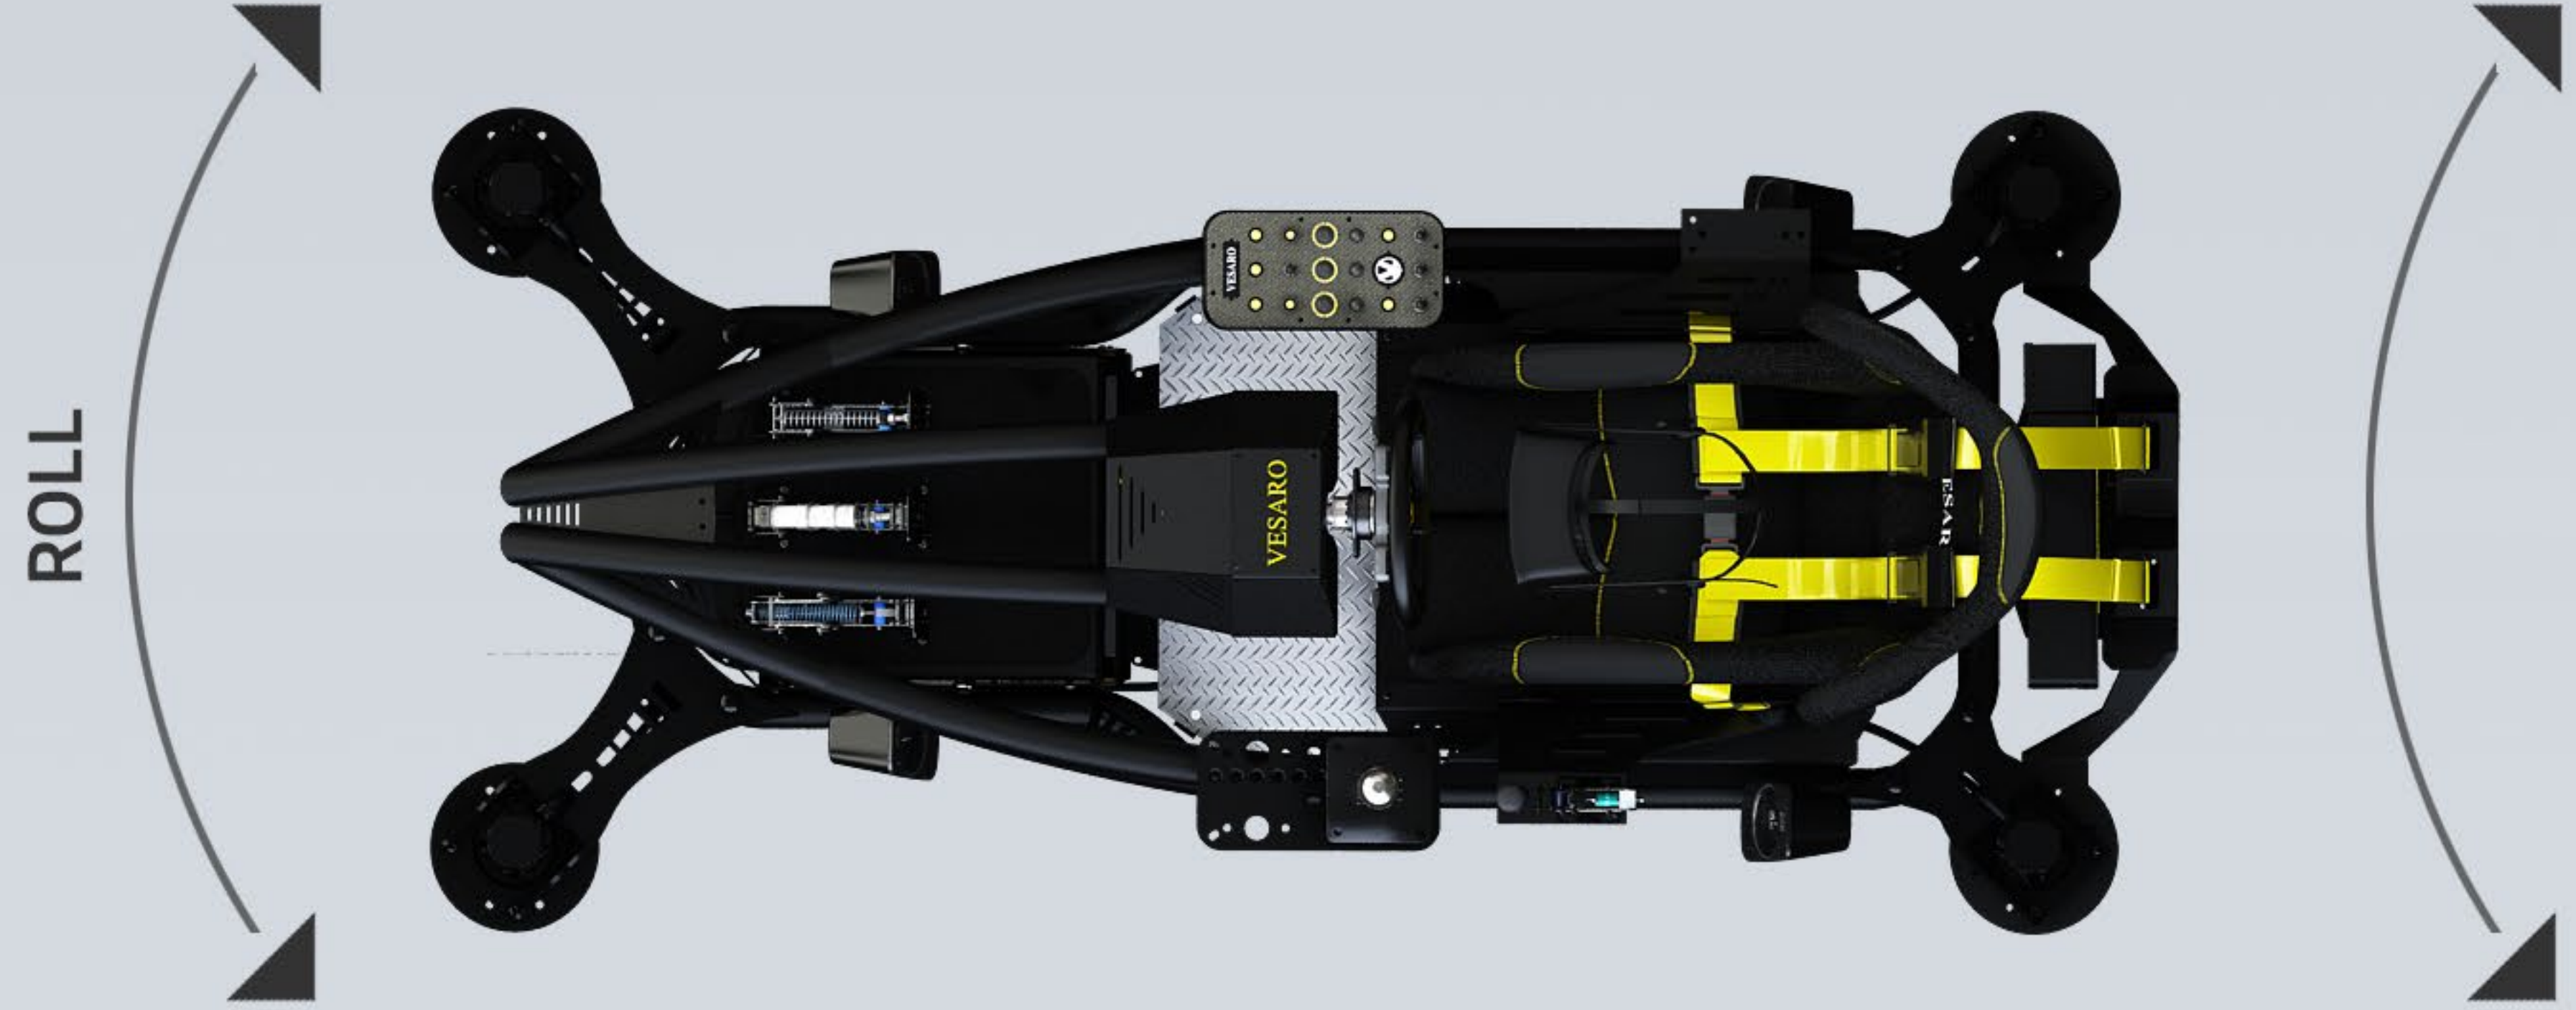

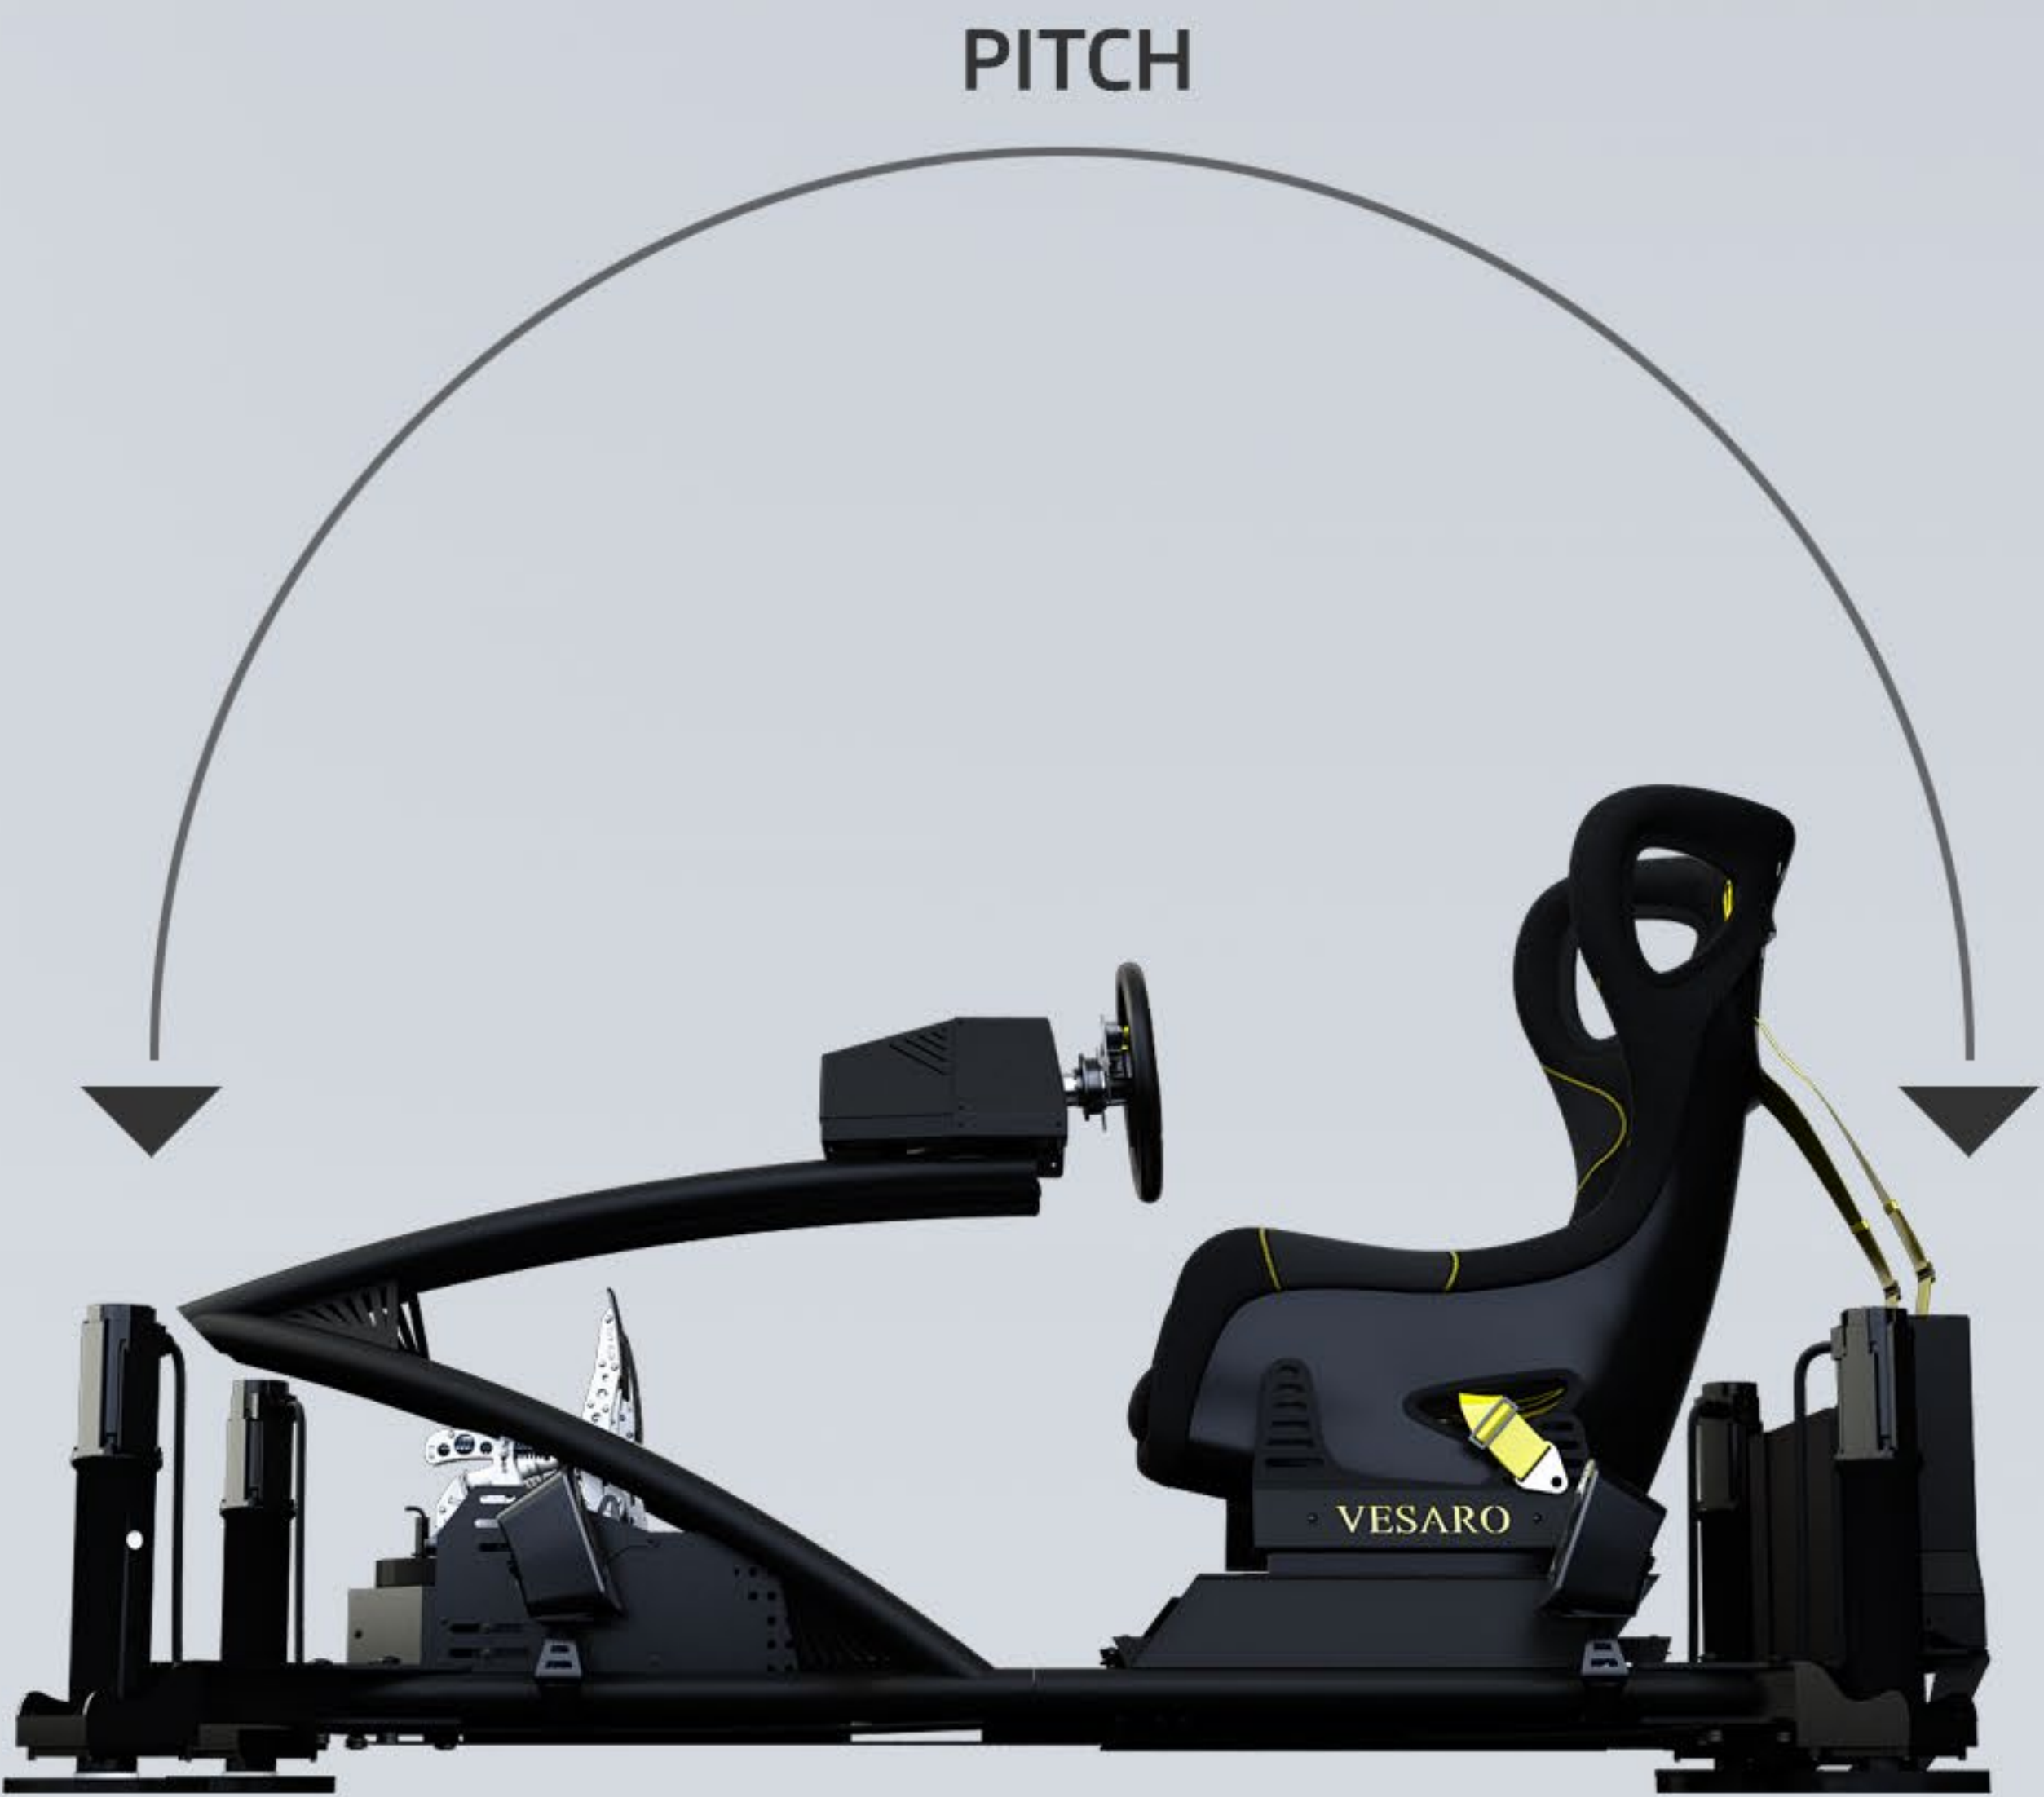

# Vesaro Motion

The D-BOX haptic technology offers Heave, Pitch and Roll movement, as well as multi position intelligent tactile feedback vibrations.

The motion provides full recreation of the suspension and vehicle movements of the real world equivalent race cars and the intelligent vibration creates the tactile sensations of the road feel, engine vibration and other tactile sensations.

(Motion optional in some models)

**D-BOX**

**OFFICIAL**  
LICENSED PRODUCT

For several months, FIA engineers and numerous technical experts of the Federation reviewed D-BOX haptic systems and confirmed it to be the best haptic solution available today.

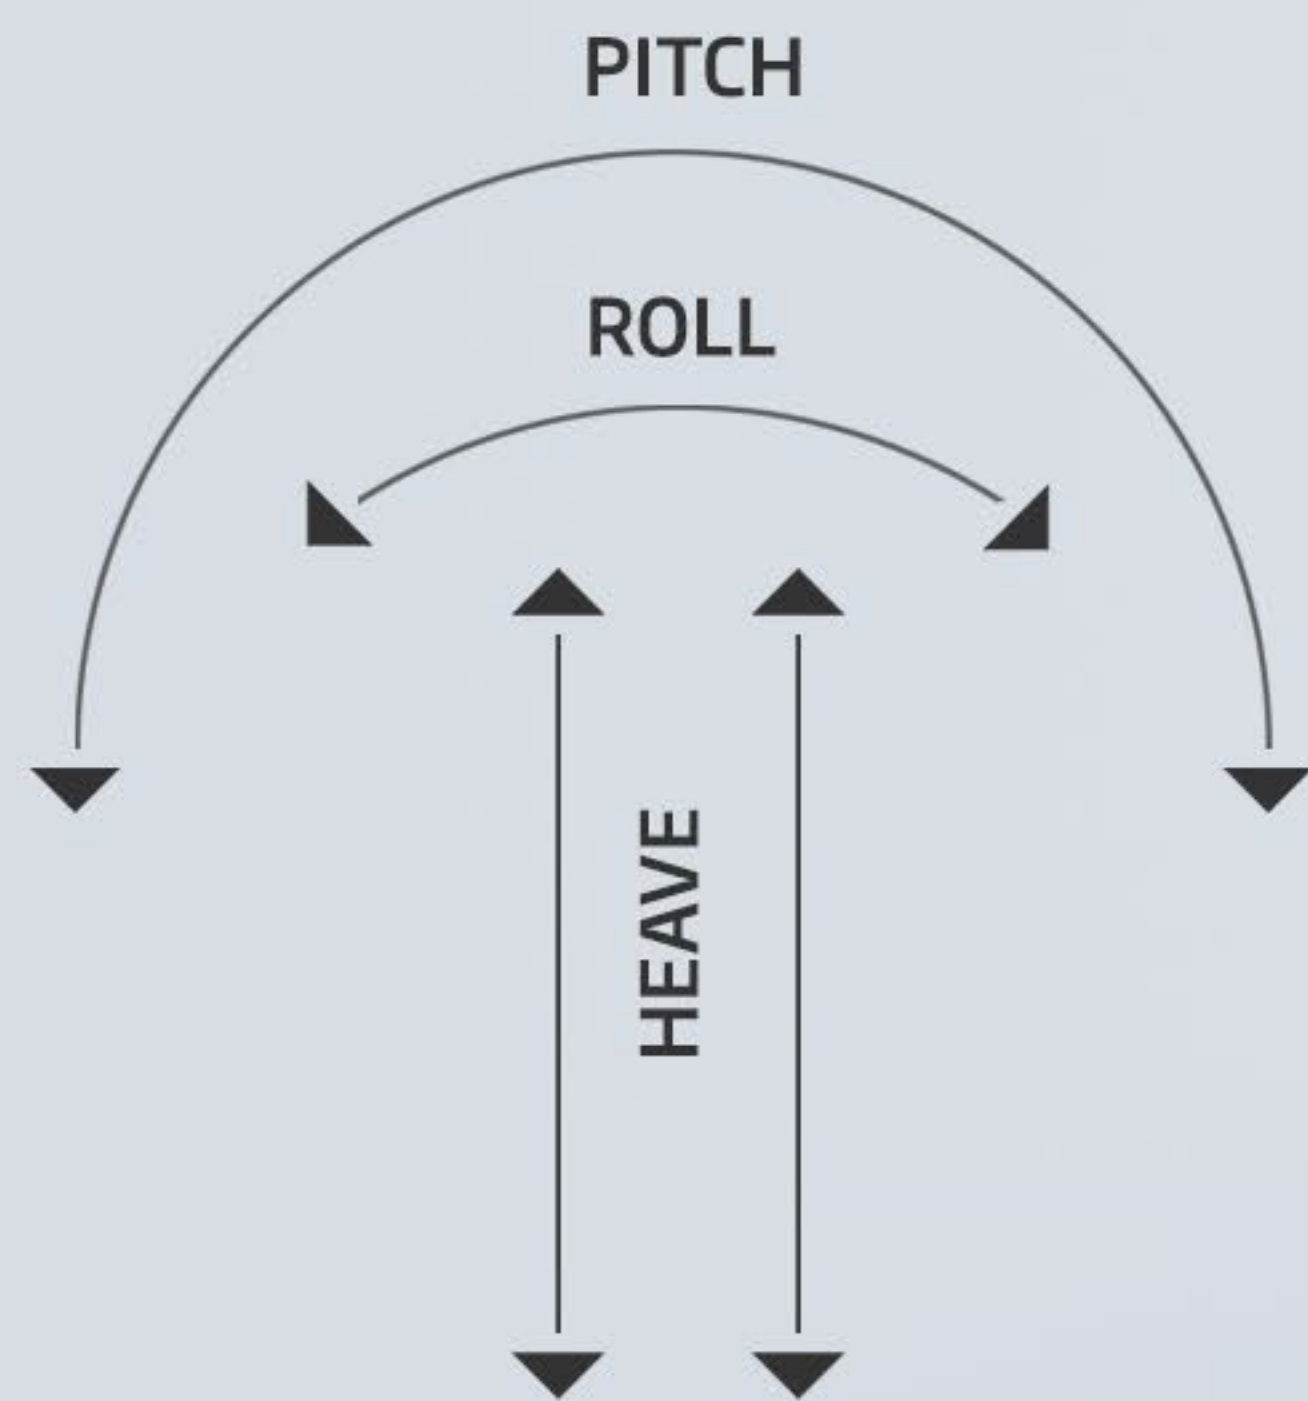

# Seat Belt Tensioner G-Force System

G-Force seat belt tension system provides sustained G-Force effects under braking, the holy grail of motion g-force effects, an otherwise unobtainable G-Force feeling, resulting in accurate feedback through your body from the moment you apply the brake to the moment you lift off.

The system greatly increases immersion by applying controlled code based force on the seat belt harness under braking.

The system works in combination with our D-BOX haptic modules providing up to 3 axis force effects to the seat belt tensioner system, this results not only in braking forces being recreated, but also subtle cornering forces, impacts, curbs and gradient changes.

The integrated tensioner mechanism uses a rotating arm which allows the left and right shoulder harness of the seat belt system to move independantly accommodating cornering forces during motion roll. The rotating arm is connected to accurately tensioned springs providing a progressive feel as the g-force effect is applied to your body.

- PITCH = Sustained Braking G-Force
- ROLL = Cornering G-Force effects
- HEAVE = Curbs and track elevation changes
- COMBINED = General force effects

## On Board Audio

Our premium audio solution is a fully integrated on-board 5 speaker audio system featuring 4 satellite speakers powered by a high end Vibe amplifier and a low profile powered Alpine subwoofer with indepent bass remote control. The system is powered and ready to use as soon as you switch on your simulator and provides a clean and simple to setup audio solution with no componenents connected seperately to the simulator.

Vibe Amplifier .....

# Pro Controls V-Spec H-Pattern shifter

H-Pattern shifter offering the most realistic gear shifter feeling available on the market today. Utilising Quaife Engineering internal gear mechanism that utilises selector rods and a centralised device that is found on most real world gearboxes as apposed to the standard gate plate found on most h-pattern shifters.

8 Speed with 6 forward and 2 reverse gears allowing reverse forward or backwards.

Mount on left or right side of the rig.

Commercial grade construction

# Pro Controls V-Spec Sequential Shifter

Professional sequential shifter. Full metal construction offering a solid shift feeling ideal for any sequential vehicles or rally applications.

Mount on left or right side of the rig.

# Pro Controls V-Spec Extreme Sequential Shifter

Professional sequential shifter with neutral engage lever. Full metal construction offering a heavy duty shift feeling ideal for any sequential vehicles or rally applications.

2 buttons, toggle switch and rotary switch.

Mount on left or right side of the rig.

## Pro Controls V-Spec GT1 Wheel

Professional wheel rim compatible with our Pro Controls direct drive wheel bases and featuring an integrated colour display screen showing vital information in clear line of sight.

The wheel uses an authentic Sparco racing rim and has carbon fibre paddle shifters with magnetic retraction for a solid and responsive gear change.

- 310mm Lightweight Sparco GT rim
- Motorsport quality carbon fibre shifter paddles
- 6 High quality Knitter pushbuttons
- 2 Toggle switches (2 way)
- 2 Rotary encoders

# Pro Controls V-Spec GT3 Wireless Wheel

Professional wireless wheel rim compatible with our Pro Controls direct drive wheel bases

The wheel uses an authentic Sparco racing rim and has carbon fibre paddle shifters with magnetic retraction for a solid and responsive gear change.

- 8 x High Quality Pushbuttons
- 2 x Two-Way toggle switches
- 2 x Rotary Encoders
- Anodised Aluminium Construction
- Motorsport Quality Paddle Shifters
- Rugged Coiled USB cable with panel-mounted inline Connectors
- Battery Status LEDs
- Long-Life Lithium Polymer battery.
- 2 x Pre-Paired Wireless Receivers
- Retractable USB charging Cable

# Pro Controls V-Spec LMP Wheel

Professional wireless wheel rim compatible with our Pro Controls direct drive wheel bases

Designed for modern LeMans racing cars.

- 300mm Diameter
- Moulded Polyurethane grips
- Rigid Aluminium Chassis
- 12 pushbuttons
- 2 toggle switches
- 5 Rotary Switches
- Snap Action Gear Shifters with carbon paddles.
- Motorsport coiled cable
- PC Use only

# Pro Controls V-Spec Formula Extreme

Professional wheel rim with integrated colour display, designed for professional and commercial use as well as customers requiring the highest quality materials, authentic feeling and features to suit the most demanding simulation application requirements.

- Motorsport quality carbon fibre shifter paddles
- 12 High quality push buttons
- 3 Rotary encoders
- 6 Rotary thumb dials

# Pro Controls V-Spec LMX

300mm endurance style wheel

ChromaWorx lighting system grants you the freedom to customise your control layout like never before. All 12 of the high-quality tactile buttons and 4 rotary dials are lit up with full RGB colour, and are configurable via our ChromaWorx App.

Feature a MFS (Multi-Function Switch), giving you 7-way control over in-game menus

Bright 4.3in LCD Display and 16 RGB LEDs to present you with all the information you need when racing.

Magnetic Gear Shifters

Quick Adjust Paddles and Dual clutch Paddles available as optional add-ons(request when purchasing)

Fuel Last 4.1	Fill to End 80.6	Delta -0.43	Current Lap 1:42.054
Laps Left 5.1	Fuel 20.5	Gear 3	Last Lap 2:15.267
112 23.4	113 23.5		Best Lap 2:14.748
118 22.1	119 22.3	Lap 15 Pos 02	Bias 51.5 RPM 1305

VESARO

## Pro Controls V-Spec Classic

Professional wheel rim designed for vintage and classic racing utilising a genuine sparco racing rim and our quick release system allowing you to switch between this and other racing rims such as Formula or GT.

## Pro Controls V-Spec DDU Data Display Unit

Steering Deck mounted digital data display unit with a vibrant 4.3in LCD display and 16 integrated RGB LEDs, the DDU provides an intelligent interface to your Vesaro simulator.

Using 16 full RGB LEDs, all individually adjustable in function, colour, and brightness, you can create your perfect data display.

- Black anodised CNC aluminium chassis
- Genuine carbon fibre rear cover
- All mounting hardware included

# Pro Controls V-Spec Handbrake

A commercial grade handbrake for rally, drifting and driving simulation style applications.

The handbrake can be horizontal or vertically mounted. to usit your preference.

The lever actuates a 120kg load cell, resulting in up to 22kg of actual force measured at the lever

Using Smart Control software, you have complete freedom to set custom non linear output curves

All structural parts are CNC precision laser cut steel with a bead blasted or fine structured powder coat finish

A 2 stage spring system provides resistance when pulling the lever. An initial metal coil spring simulates the pad to disc gap or slack on the handbrake cable. The main loading on the handbrake is simulated by compressing the elastomers, giving an unprecedented progressive brake feel.

The Sim Handbrake comes with a powerful configuration tool that allows you to set up the handbrake. Smart Control allows for instant mapping of (non linear) output curves, dead zone and handbrake force. All settings can be saved into profiles and can be loaded up again in a few mouse clicks.

Included with the handbrake: Three elastomers, soft, medium and stiff, adaptor plate with yaw adjustment for aluminium profiles and a USB cable to connect the handbrake to a PC

## Rig Mounted Display Bracket (27" - 50")

Space saving display mounting solution that attaches directly to the nose of the Vesaro I Rig.  
Features a built in cable management and adjustable tilt angle.  
Supports monitor sizes from 27" to 50"  
(For non-motion setups only)

## Single Display Stand (27" - 65")

Free standing display stand with a design that allows it to be bridged over the top of the Vesaro I rig for complete control over the distance between the screen and your seating position. The screen height can be adjusted over a 15cm(150mm) range and the frame includes an integrated cable management system allowing routing of cables through the tubing for a clean and tidy setup. Supports monitor sizes from 27" to 65".

## Triple Display Stand Compact (27" - 32")

Vesaro Compact Triple Display stand designed for customers that require a compact footprint.

Allows mounting of multiple screen sizes in triple formation using a unique slide and angle adjust mechanism. Features outer screen angle adjustment, vertical height adjustment and cable management.

Supports triple 27" - 32" Displays with 75mm x 75mm and 100mm x 100mm VESA mounts.

Includes cable management

Example of the Triple display Stand Compact in use with 27" Monitors

## Triple Display Stand (27" - 50")

Features a unique slide and rotate arm mechanism allowing different size displays to be perfectly aligned for triple screen viewing. The outer screen angles can be adjusted to suit your viewing preference and screen height can be adjusted over a 15cm(150mm) range. An integrated cable management system allows routing of cables through the tubing for a clean and tidy setup and a fold-away mechanism allows the outer screens to be folded inwards for storage and space saving when not in use. Supports monitor sizes from 27" to 50" in Triple Screen formation.

## Triple Display Stand Plus (27" - 50")

The plus model is designed for heavy TV's and 55 inch screens. It features all the features of the standard Triple Display Stand product.

" - 55")

creens. The plus model includes all of the great

## Triple Display Stand Oversize (55" - 65")

Designed for displays 65 inch and larger in triple formation. Features adjustable outer angles, cable management and height adjustment over a 15cm range. The stand is made up of three separate stands making transportation and storage easy

# Virtual Reality Headset Display Solution - Varjo Aero

Varjo Aero professional standard Virtual Reality headset solution with 2880 x 2720 pixel resolution per eye

Add a VR headset to your Vesaro simulator for an immersive 3D visual experience that puts you directly into the cockpit. Built in headtracking allows you to move your head and see in the direction that you are looking.

Wearing a VR headset combined with selection of the helmet cam view in the software adds to the immersion by closely replicating the feeling and visual of wearing a real race helmet.

We offer VR as an add-on to existing single or triple display setups, providing you with the option of both

# Virtual Reality Headset Display Solution - Oculus Quest 2

Oculus Quest 2 consumer Virtual Reality headset solution with 1832×1920px pixel resolution per eye and inside out tracking.

Add a VR headset to your Vesaro simulator for an immersive 3D visual experience that puts you directly into the cockpit. Built in headtracking allows you to move your head and see in the direction that you are looking.

Wearing a VR headset combined with selection of the helmet cam view in the software adds to the immersion by closely replicating the feeling and visual of wearing a real race helmet.

We offer VR as an add-on to existing single or triple display setups, providing you with the option of both types of display solution or you can purchase one of our dedicated VR setups for customers wanting to use

# Touring & Rally (Standard Vesaro I rig configuration)

The standard Vesaro I rig setup is designed with a more upright seating position commonly found in touring, rally or general road cars.

Featuring a fully adjustable pedal distance using a quick release system and adjustable pedal deck angle with 4 positions.

The seat has a quick release handle allowing the distance position to be quickly changed and the seat angle can be adjusted to suit your preference with three front and three rear position points.

The steering deck distance can be adjusted using the optional Pro Steering Plate addon.

# GT & Formula (Using the GTF Conversion Kit)

Our GT & Formula style setup utilises the GTF conversion kit module, available as standard with many of our systems or can be upgraded to an existing Vesaro I rig.

This solution provides a seating setup commonly found in GT race cars and provides a comfortable and practical formula style seating position when used with our optional **Formula Tillet seat** . .....

The system raises the pedal height, lowers the seat including increased angle and lowers the wheel deck.

The raised pedal deck provides on board storage space at the front of the simulator and features fully adjustable pedal position with a quick release system and adjustable pedal plate angle.

# Multiple seat options

Choose the perfect seat to suit your needs.

Corbeau Sprint X

Corbeau Revolution X

Corbeau Sportline RXI Diamond Edition

Tillet Formula Pro

Recaro Podium

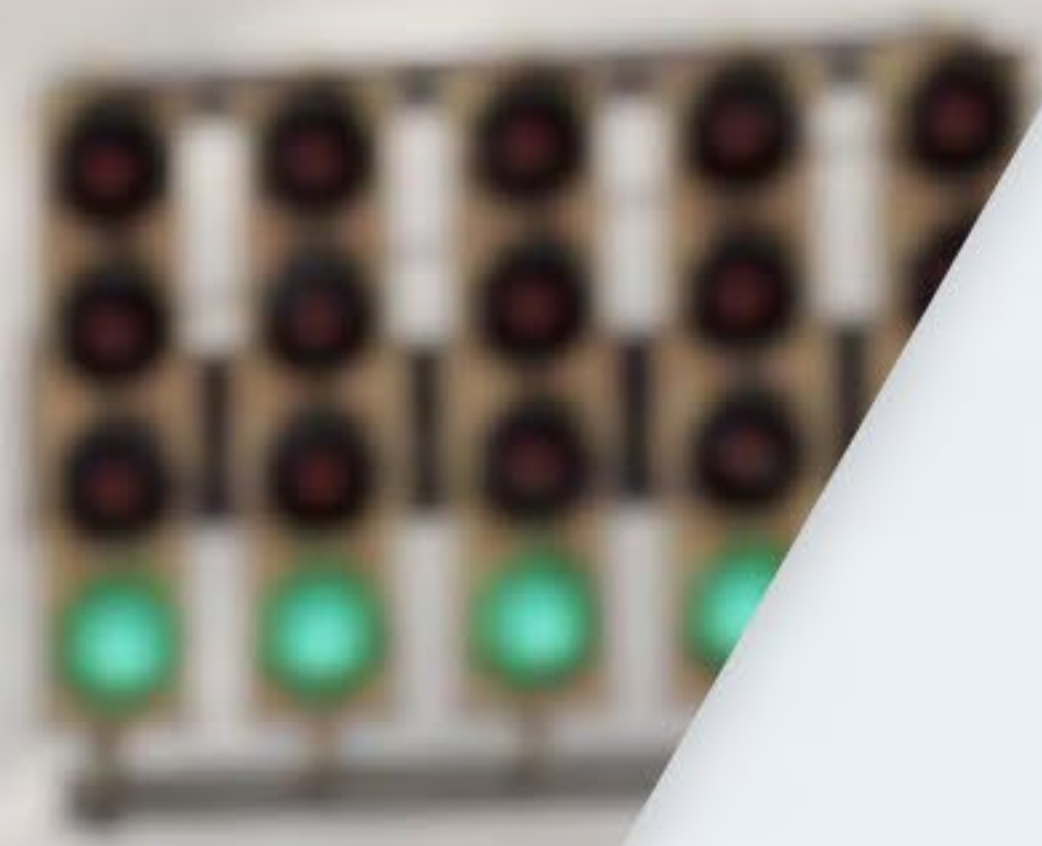

Cobra Misano S Anniversary Edition

## Simulation software

Race on hundreds of circuits from around the world across multiple disciplines.

Practice on virtual circuits ahead of the race.

Simulate real world weather conditions including rain, fog and snow

Simulate day and night driving

Race against AI controlled cars or online against other drivers to hone your skills.

## Complete car customization and setups

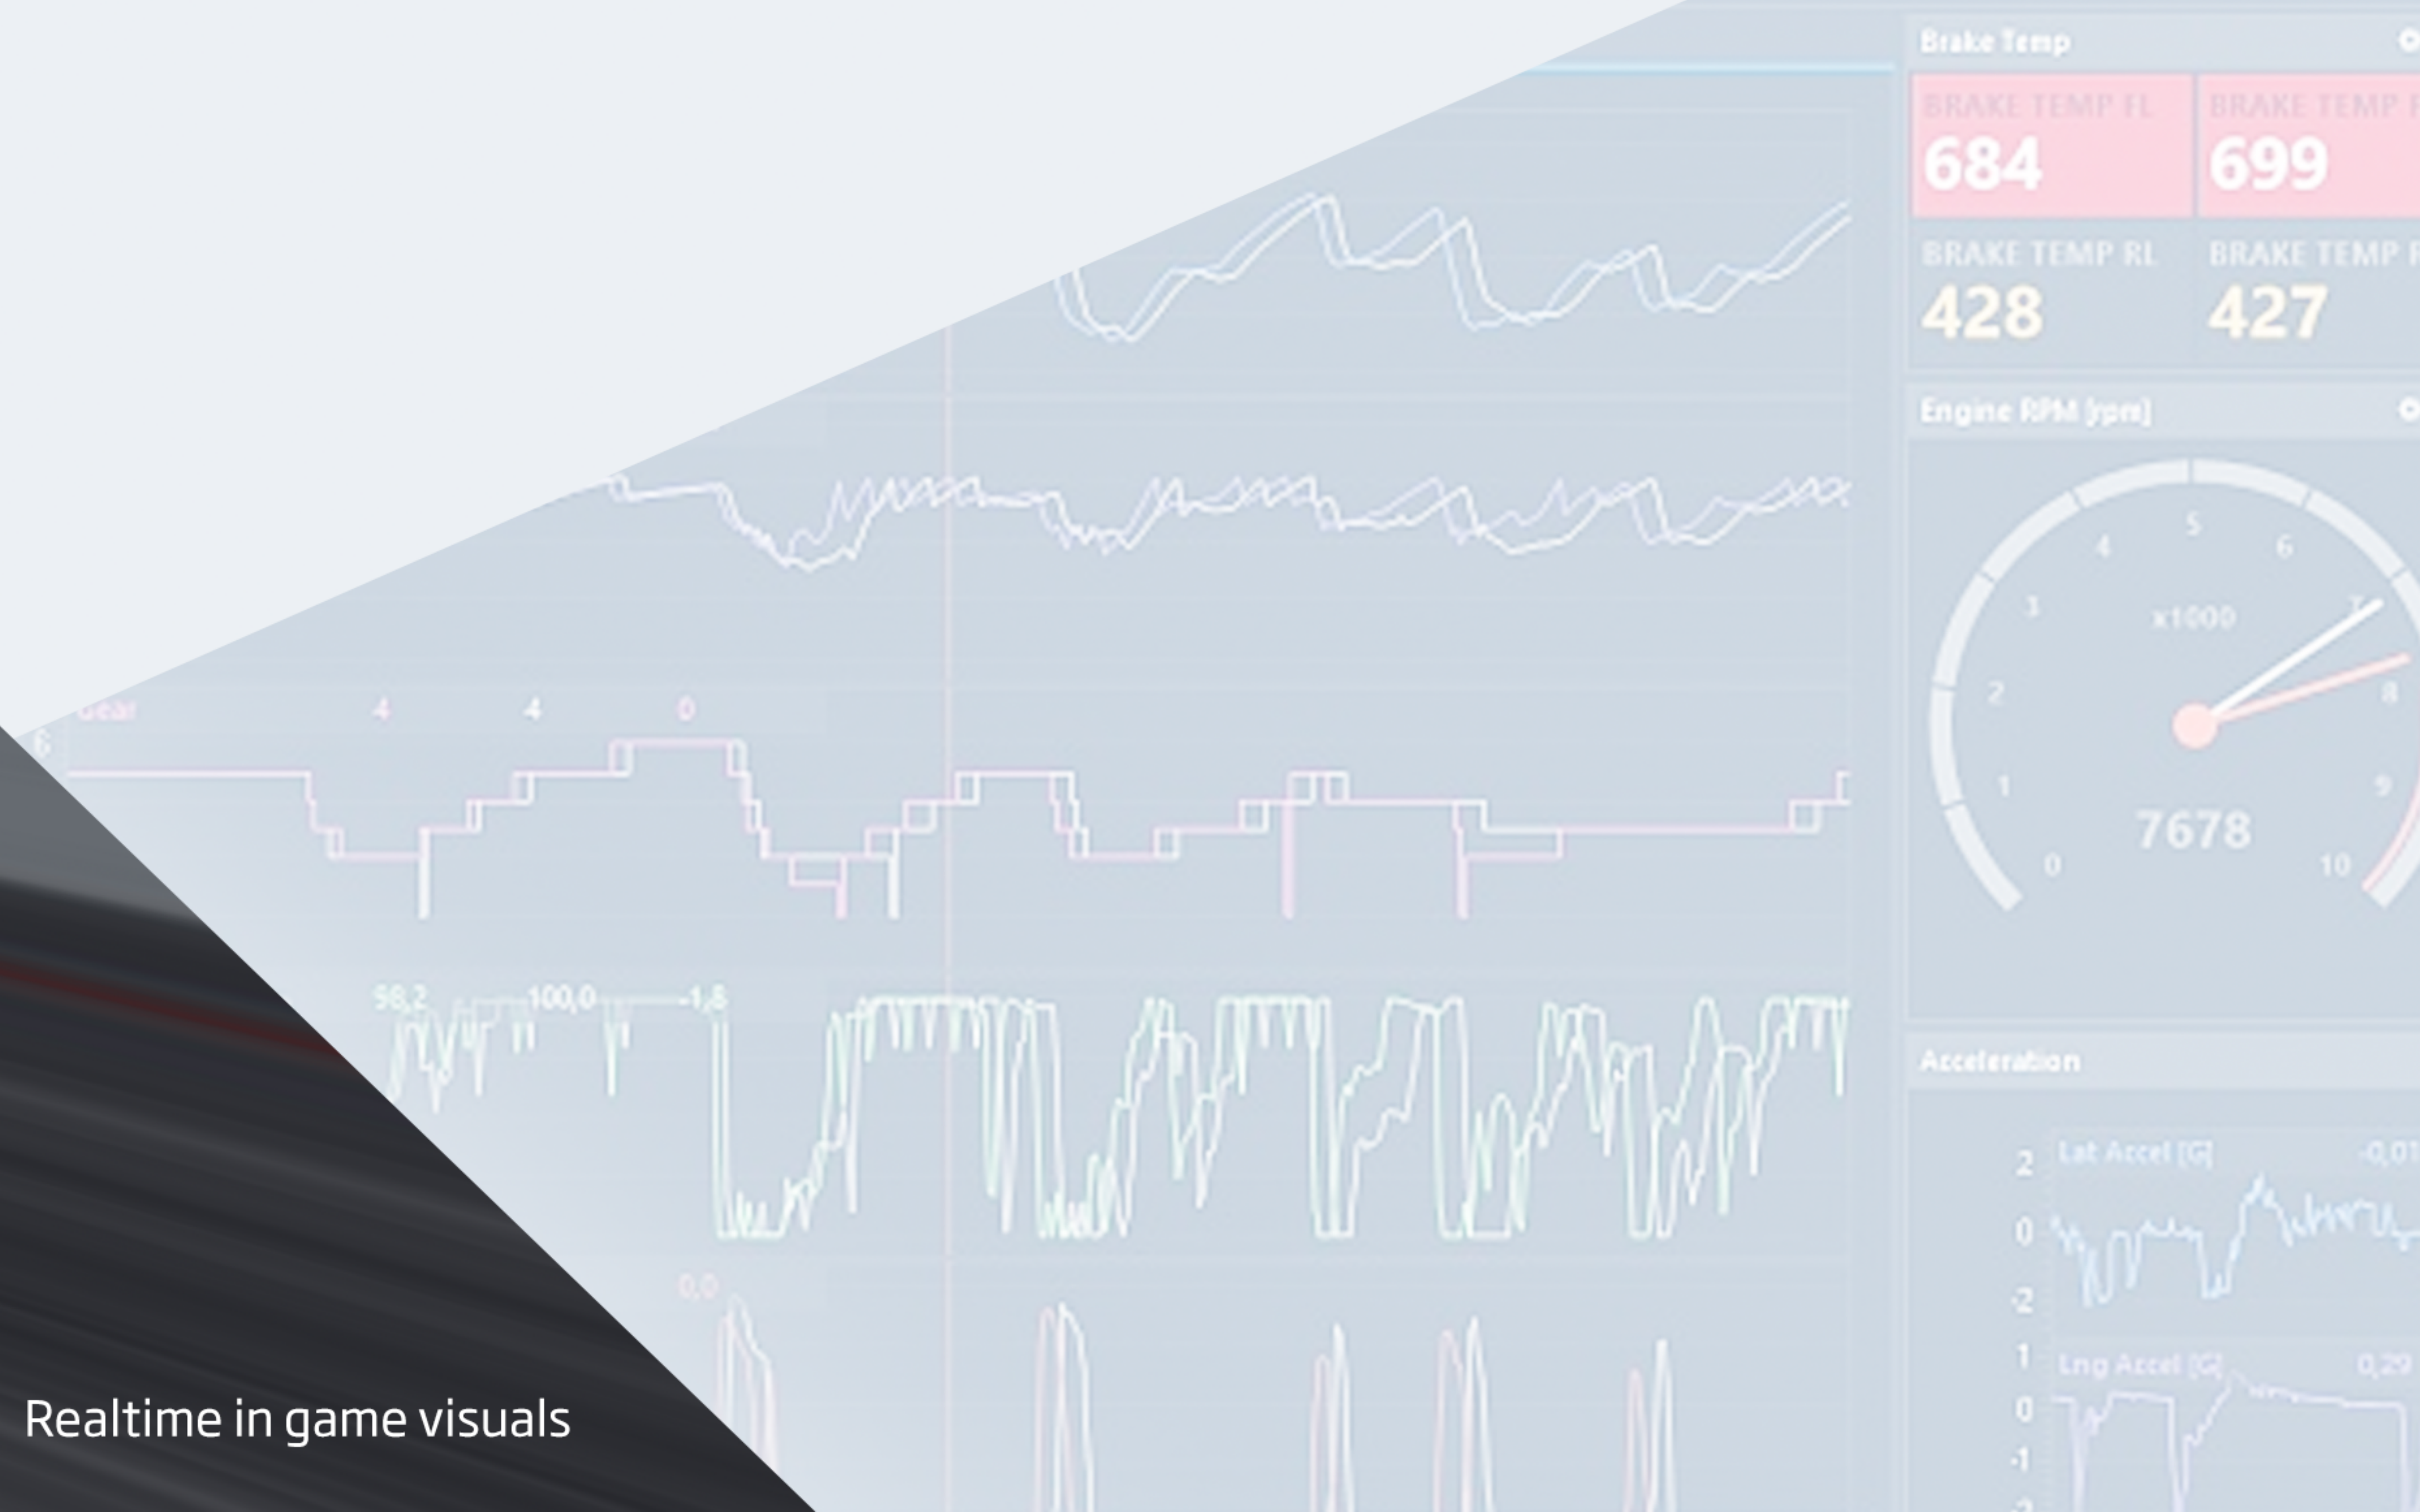

Setup every aspect of your car from suspension to brake balance and save profiles to suit different tracks

## Telemetry for data analysis

Improve your lap times by analysing your race data including speed, engine RPM, Gear, throttle and brakes

Realtime in game visuals

## Vesaro I Modular Professional Series

Vesaro I Professional simulators are designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the highest standard components.

# Vesaro I Modular Professional Stage 1

Vesaro I professional simulator designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best.

The simulator comes Plug and Play factory assembled by default and includes a professional grade direct drive steering force feedback system, designed for the ultimate in authenticity and realism and offering direct feedback of the cars steering system, road texture and general forces.

- ♦ Vesaro I Chassis
- ♦ Vesaro I Modular GTF Conversion Kit
- ♦ Vesaro Pro Controls Dashboard
- ♦ Pedal Under Tray Storage system
- ♦ Vesaro Signature Cobra Evolution Pro GT
- ♦ Seat Belt - 4 Point Racing Harness Level 1
- ♦ Integrated Audio System - 5 Speaker On-Board Audio
- ♦ Pro Controls Wheel Base V-Spec
- ♦ Pro Controls V-Spec - GT3 Wheel
- ♦ Pro Controls V-Spec - GT3 Wheel Quick Release Hub
- ♦ Pro Controls V-Spec DDU Data Display Unit
- ♦ Pro Control V-Spec Pedals - Black Edition
- ♦ Vesaro PC On-Board Level 1
- ♦ Software - Personal Use - Assetto Corsa
- ♦ Cable And Adaptor Kit - Single Display Stand, Power Kit, Combined Event Wireless Keyboard and Mouse
- ♦ Triple display Stand Compact
- ♦ Triple Display Screen 32 Inch Curved
- ♦ Plug and Play Factory Assembly + Wooden Shipping Crate
- ♦ 2 Year Warranty, Vesaro Free Support

# Vesaro I Modular Professional Stage 2

Vesaro I professional simulator designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best. Featuring a D-BOX haptic system with multi axis full rig movement and two point intelligent tactile feedback providing realistic feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking.

The simulator comes Plug and Play factory assembled by default and includes a professional grade direct drive steering force feedback system, designed for the ultimate in authenticity and realism and offering direct feedback of the cars steering system, road texture and general forces.

- ♦ Triple Display Stand Compact
- ♦ Triple Display Screen 32 Inch Curved
- ♦ Plug and Play Factory Assembly + Wooden Shipping Crate
- ♦ Vesaro Free Support

# Vesaro I Modular Professional Stage 3

Vesaro I professional simulator designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best. Featuring a four actuator D-BOX haptic system with 3 axis full rig movement, pitch, roll and heave with four point intelligent tactile feedback providing realistic feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking. Featuring a triple curved wraparound display and increased computer performance for higher fidelity graphics.

The simulator comes Plug and Play factory assembled by default and includes a professional grade direct drive steering force feedback system, designed for the ultimate in authenticity and realism and offering direct feedback of the cars steering system, road texture and general forces.

# Vesaro I Modular Professional Stage 4

Vesaro I professional simulator designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best. Featuring a 3 inch four actuator D-BOX haptic system with 3 axis full rig movement, pitch, roll and heave with enhanced travel creating more realistic interpretation of road cambers, curbs and surface bumps. Four point intelligent tactile feedback providing realistic feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking. Featuring a large 165 inch wraparound display utilising three 50 inch curved displays and increased computer performance for higher fidelity graphics.

The simulator comes Plug and Play factory assembled by default and includes a professional grade direct drive steering force feedback system, designed for the ultimate in authenticity and realism and offering direct feedback of the cars steering system, road texture and general forces. The steering wheel features an enhanced integrated colour display screen offering essential information where you need it.

- ♦ Triple Display Stand Plus
- ♦ Triple Display Screen 55 Inch LED HD TV - Flat
- ♦ Plug and Play Factory Assembly + Wooden Shipping Crate
- ♦ 2 Year Warranty, Vesaro Free Support

## Vesaro I Modular Professional VR Series

Professional VR solution with the flexibility of a large curved single display which can be utilized as the main display for racing when not using the VR headset, as well as for setup and control. The system is designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best performance and quality.

# Vesaro I Modular Professional VR Stage 1

Professional VR solution with the flexibility of a large curved single display which can be utilized as the main display for racing when not using the VR headset, as well as for setup and control. Designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best.

The simulator uses a 2 actuator D-BOX haptic system with multi axis full rig movement, pitch, roll and rear heave, 1.5 inches of travel interpret the surface detail, curbs and impacts. Two point intelligent tactile feedback provides additional tactile feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking.

- ♦ Vesaro I Chassis
- ♦ Vesaro I Modular GTF Conversion Kit
- ♦ Vesaro Pro Controls Dashboard
- ♦ Pedal Under Tray Storage system & On-Board PC Mounting System
- ♦ Vesaro Signature Corbeau Sprint X
- ♦ VR Headset - Oculus Quest 2
- ♦ Single Display Stand
- ♦ Single Display Screen 55 Inch Ultra 4K LED TV - Flat
- ♦ Seat Belt G-Force Tensioner System with 4 Point Racing Harness
- ♦ Motion Systems: Vesaro Dual Motion 1.5
- ♦ Pro Controls Wheel Base V-spec
- ♦ Pro Controls V-Spec - GT Wheel & Quick Release Hub
- ♦ Pro Control V-Spec Pedals - Black Edition
- ♦ Vesaro PC On-Board Level 1
- ♦ Software - Personal Use - Project Cars 2
- ♦ Cable And Adaptor Kit - Single Display, Power Kit, Combined Event Wireless Keyboard and Mouse
- ♦ Plug and Play Factory Assembly + Wooden Shipping Crate
- ♦ Vesaro Free Support

# Vesaro I Modular Professional VR Stage 2

Professional VR solution with the flexibility of a large curved single display which can be utilized as the main display for racing when not using the VR headset, as well as for setup and control. Designed for private or home customers requiring high end Motorsport grade components for personal race driver training or home enthusiasts who require the best.

The simulator uses a 3 actuator D-BOX haptic system with 3 axis full rig movement, pitch, roll and full heave, 1.5 inches of travel interpret the surface detail, curbs and impacts. Three point intelligent tactile feedback provides additional tactile feedback of the road surface, suspension travel, impacts and subtle force effects. This is combined with our G-Force seat belt system providing sustained g-force effects under braking.
