

## About Us

Vesaro is a British Design and Manufacturing company with its Headquarters in the heart of Kent in England. From here we Design, Engineer and Build some of the worlds most Advanced simulators. Our core product is the world's only commercial grade modular simulation system, offering versatility that has never been seen before. In addition to the core Vesaro I modular system Vesaro design and build Flight, Helicopter Simulators and Formula body style F1 simulators, making Vesaro a complete solution for your entertainment and training needs.

The Vesaro facility is in the South East of England, approximately 1 hour from London. Over 14000 Square Feet of space houses various areas of the business, including our paint shop, Warehouse, workshop, Parts storage, assembly area, computer build area, offices and a 5500 SF showroom.

## The Vesaro System

Our system is based around an ultra-strong hand crafted centre core that can be adapted from the core system up to a full triple screen motion physics simulator. There are thousands of possible rig setups making the Vesaro system the world's first truly modular commercial grade simulator system.

Introducing a truly Modular design that allows you to adapt our ultra-strong central core rig from mid-range setup to professional training simulator.

Designed for PC, XBOX and PlayStation the Vesaro system offers a perfect mix of modular flexibility, beautiful stylish design and ultra-stable engineering.

This modular flexibility allows you to start with the core rig and expand the complexity of your setup as you need. The system allows you to build a specific setup to suit your exacting needs, with the option to choose different steering set-ups, 5 different motion options, an advanced Tactile Feedback System, THX 5.1 surround sound audio, single and triple display and many more. With over 200 modules the Vesaro modular system is the only truly modular system allowing complete control of your simulator requirements.

The central core rig is built with full motion capability in mind and therefore is designed to be super strong and rigid, this approach allows you to start with a non-motion core rig and upgrade later.

A choice of professional Cobra seats for the ultimate in comfort and authenticity, with the ability to upgrade or change your seat choice to suit your exact needs.

The pedal plate can be easily adjusted backwards and forwards and up and down to accommodate a wide range of driving styles and people. In addition, the seat can be easily adjusted using the quick release handle.

Supports the most popular control systems as well as advanced professional Vesaro control systems offering unrivalled flexibility.

Comes in a Black finish with custom colours available for bespoke commercial orders.

Vesaro PC systems are custom built for Sim Racing and feature the highest quality components to power your Vesaro simulator with the highest performance possible.

## Introduction to the Vesaro system

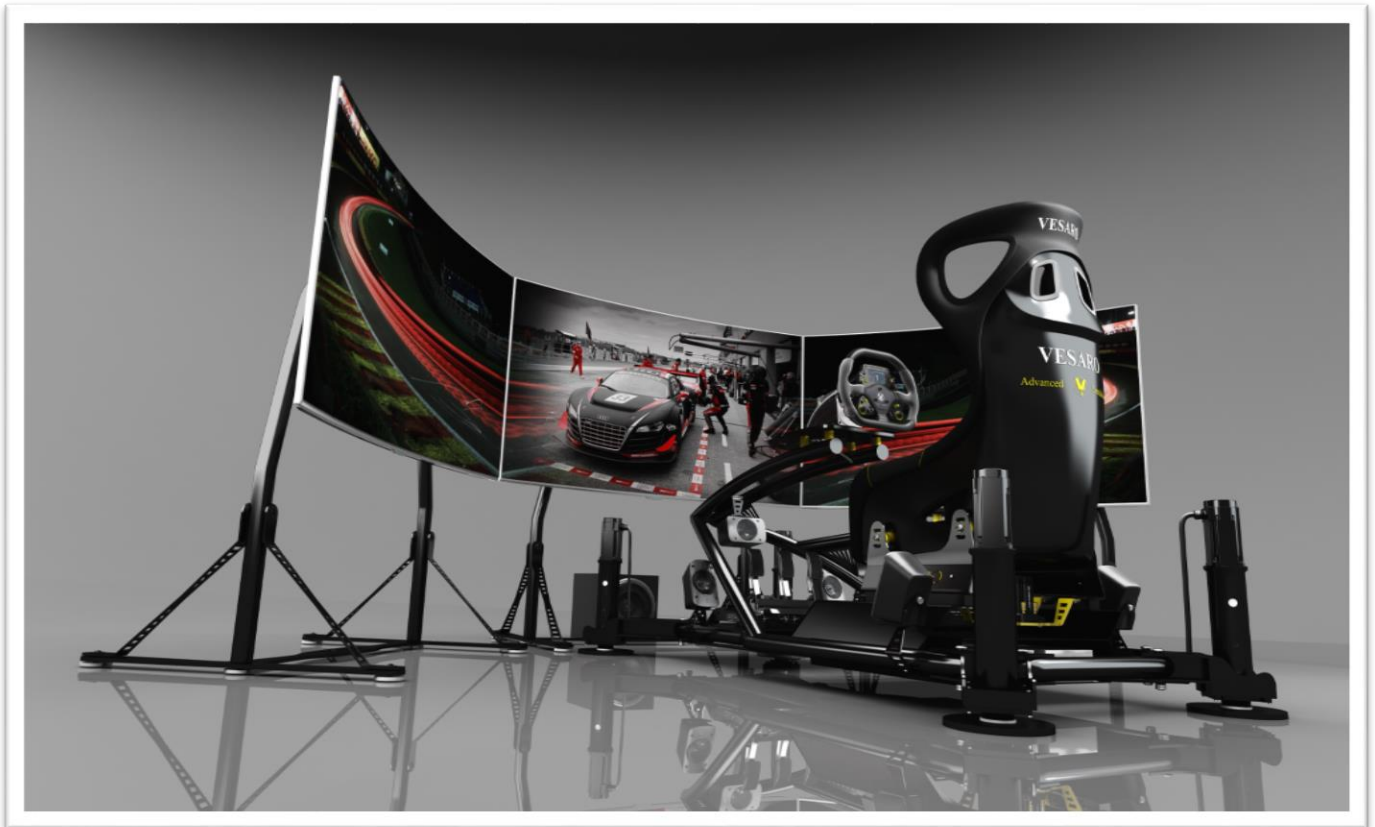

### Breakdown of Features

#### The central core rig

The central core comes in a Black powder coat finish. The front half of the rig is a single welded frame creating an ultra-strong and stable platform. The rear section also features a fully welded structure with multiple strengthening braces providing a stable platform for the seat. By avoiding the use of several parts bolted together potential weak points are eliminated. The two main sections are connected by only four bolts making the rig easy to disassemble and store or move to a new location. With our design, we have no centre post which can obstruct the drivers leg movement and create difficulty entering and exiting the rig, instead our design realistically simulates the environment in which you would find yourself if driving a real race car. Built to commercial grade construction the rig is designed to last. The ultimate in quality is achieved using laser cut steel and computer controlled CNC bent tubing, each rig is then fabricated using ultra strong tig and mig welding. The finished rig is then powder coated to the highest quality standards.

#### Cable Management and Storage

All our rigs come with cable management routing allowing you to hide your cables inside the tubular frame. In addition, every rig comes with a storage unit to house and protect the electronic components.

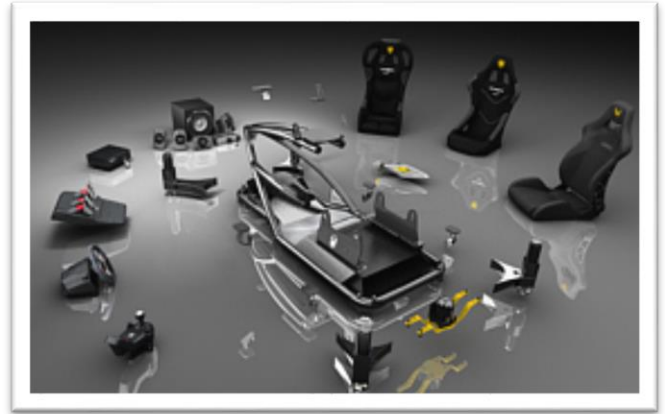

#### Professional Cobra seats

A choice of professional Cobra seats for the ultimate in comfort and realism, giving you the ability to upgrade or change or upgrade the seat to suit your needs. Seat choices include the Monaco Pro Bucket Racing Seat, the Signature Club Pro, the Cobra Misano Reclining Racing Seat for a more refined experience or the Cobra Evolution Pro & GT Bucket Racing Seats for complete racing authenticity. For information regarding other compatible Cobra seats that we have available get in touch with the Vesaro team.

### Modular design

The central core rig is built with full motion capability in mind and therefore is designed to be super strong and rigid, this approach allows you to start with a non-motion core rig and upgrade later. Our system allows you to scale your rig from casual simulator to a full motion triple screen system without having to replace your initial investment in the core rig.

### Advanced adjustable system

The pedal plate can be easily adjusted backwards and forwards and up and down to accommodate a wide range of driving styles and people. In addition, the seat can be easily adjusted using the quick release handle.

### Multiple control support

Our system supports the most popular high end control sets including Logitech, Fanatec, Thrustmaster as well as Vesaro Pro and V-Spec controls which utilise industry leading commercial grade components.

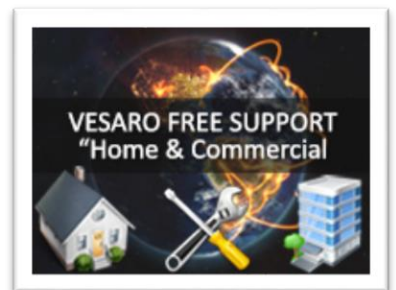

### 2 Year Warranty

We are proud to offer a 2-year warranty on all our simulators with a 10-year chassis body warranty

### Fanatical support

We are fanatical about support, that is our promise to you, we've built a system that will grow and change with you, with the understanding that if you need our help, we will be there.

For all systems that include a Vesaro PC system every PC comes with remote login assistance enabling our team of experts to remotely access your simulator at anytime to help identify any issue.

### Backup

In addition, all Vesaro simulators with a Vesaro PC include a full image backup system allowing you to restore your PC to the day of delivery giving you a quick and easy way to resolve any issue when time is of the essence.

## **VESARO I PRE-CONFIGURED SETUPS**

The vesaro system is made up of a set of modules allowing configuration of thousands of combinations and ultimately the perfect simulator for your needs, to get you started we have pre-configured several setups which can be further configured using the "Configurator" feature on our website at [www.vesaro.com](http://www.vesaro.com).

**Self Assembly** - All modules order come in a kit form where the parts must be assembled using the provided instruction guides.

**TurnKey** - We will fully assembly all included modules and handle the cable management of the electronic components. We will fine tune all of the components and optimize to the Vesaro rig. We will setup and configure the PC(if included) with all of the included electronics including installation of all drivers and setup with any included games. The system will be ready to go out of the box and will only require the attachment of the display screens(if included), plugging in of the power. A TurnKey system is provided in a custom built wooden crate to ensure safe transit of the simulator.

To make things simple we have carefully pre-configured a series of Stages in categories most relevant to your needs:

**Vesaro I Gamer** for console based setups

**Vesaro I Advanced** for our more versatile PC based setups with motion and triple display capability

**Vesaro I Advanced VR** for pre-configured VR based setups

**Vesaro I Commercial** simulators pre-configured for commercial use applications such Simulation centres or Event usage

**Vesaro I Commercial VR** for VR setups ready for commercial use.

## **Vesaro I Advanced Stage 8**

**TurnKey - £46,391**

The stage 8 features our 6-inch motion technology powered by 4 D-BOX actuators with 6 inches of available travel. The motion approach of D-BOX is to recreate the suspension travel of the car, avoiding unnecessary and over the top movements found in other motion simulators, with 6 inches of travel the versatility is opened up to its maximum making this setup ideal for not only formula one and GT but perfectly suited to rally applications where the extra travel comes into its own. Stage 8 also pushes the limits with our Level 5 water-cooled PC, featuring the ultimate in performance components. 141 inches of wraparound display provide the visuals combined with 5.1 Surround sound and 5-point tactile feedback providing audio and tactile sensations. With both Formula and GT style rims in quick release setup and a genuine Cobra bucket racing seat in this configuration the stage 8 is an accomplished combination of high end Vesaro modules.

## Vesaro Detailed Features

- Commercial grade simulator construction.
- Lazer cut and tig/mig welded heavy duty steel construction.
- Quick release fully adjustable pedal plate using a slide runner system
- Pedal adjustment features quick release & locking function for easy repositioning.
- Adjustable pedal plate angle for total flexibility.
- Fully adjustable seating position using a quick release slider system.
- Adjustable seating height position.
- Choice of Left or Right gearstick arm position, Dual Gearstick arms or choose no gearstick at all if you prefer to use the paddle shifters for gear changes.
- Professional racing seats from world class seat maker Cobra, choices include the Cobra Monoco Pro, Cobra Misano S recliner and the Cobra Evolution Pro & Evolution Pro GT
- Advanced Tactile feedback system for a fully immersive tactile feedback experience using our custom designed tactile feedback bracket system.
- THX Dolby Digital 5.1 Surround sound audio plus our surround sound bracket system. Optical input for the best reproduction quality of surround sound.
- Single and triple display stands with adjustable distance from the seating position using an intelligent design that allows the framework to move over the top of the rig with the support structure below the rig.
- D-BOX Motion physics system A Multi-Sensorial Revolution Motion editing is a new art form, a new sophisticated discipline where art meets technology meets gaming. It leads to the rise of MFX, a multi-sensorial revolution in gaming. Action becomes motion. Sounds become motion. Events become motion. Brace yourself for an entirely new, unforgettably immersive experience. All of this is made possible by the patented, award-winning technology. Only D-BOX offers MFX using 3 types of intelligent movement (subtle pitch, roll and heave) to move you gently forwards and backwards, from side to side and up & down. Combine that with the D-BOX-encoded intelligent vibrations and it all comes together to create the most amazing, all-encompassing simulation experience ever.
- Vesaro dedicated Sim PC systems - custom designed and built for advanced simulation and extreme gaming. Our systems use only the best industry leading components and are designed to ensure future proof compatibility with the Vesaro motion system and triple display setups. Every system supports triple display output at high resolution and comes pre-configured for the Vesaro motion systems D-BOX motion code. In addition, all systems come with digital optical audio ensuring true digital surround sound when linked to the 5.1 surround sound audio systems that are available with our rigs. Wireless networking/broadband connectivity also ensures that your Vesaro rig is not tied down.

## Vesaro Seat Options

For more seat options please visit the Vesaro website or for any enquiries regarding custom seats please contact: [sales@vesaro.com](mailto:sales@vesaro.com).

### **Vesaro Signature Club Pro**

£249

The Club Pro offers great comfort and lateral protection when driving through the integrated padded handguard and sturdy fibreglass shell which is F.I.A approved. This seat is compatible with a five-point race harness and provides excellent reinforcement through additional side bolsters with non-slip fabric.

### **Vesaro Signature Cobra Monaco Pro Seat**

£175

The Cobra Monaco Pro is an entry-level FIA Approved seat, but the affordable price tag leaves nothing compromised. Features include full steel construction with solid back and base. Deep sided bucketed support with integral head pad and shoulder supports. Full 5/6-point harness facility. New fire retardant Spacer fabric offering greater comfort and breathability with Anthracite Suede Tec patches on wear points. Seat weighs 8kgs.

### **Vesaro Signature Cobra Evolution Pro & GT**

Evo Pro - £499

Evo Pro GT (Extra Wide) - £599

The Cobra Evolution Pro provides an authentic racing experience for your sim racing, all our seats are genuine Cobra seats. GT version provides 40mm extra width. The evolution Pro is used by professional circuit racers and rally drivers the world over who demand the ultimate in sports seating. The Evo Pro now dominates in most high-profile series and drivers now demand the cobra evolution by name, regarding as one of the finest motorsport seats available today. With a full composite, lightweight shell, suede tec grip system on the cushions and wear points, full 5/6-point harness facility if you like to stay pinned when using the Vesaro motion system.

### **Vesaro Signature Cobra Misano S + Vesaro Subframe**

£585

The Misano S is the ultimate road seat giving you a comfortable sim experience, with recliner and tilt forward facility you can tweak the adjustment to suit your racing needs. Black Composite Backrest, dual sided recline and tilt forward facility, orthopaedic backrest and lumbar support, integral headpad and shoulder supports, unique one-piece harness support slot, four-point harness facility and Silver Powder coated Side Mechanisms.

### **Vesaro Signature Cobra Imola Pro & GT**

Imola Pro - £475

Imola Pro GT (Extra Wide) - £499

The Imola Pro uses a unique custom padding system for enhanced comfort and protection whilst driving, a full 6-point harness facility if you wish to use a racing harness on your simulator. Available in a GT form offering 30mm more width if required.

### **Vesaro Signature Cobra Misano S Anniversary Edition**

£1,229

The Misano S Anniversary Edition is the ultimate road seat giving you a comfortable sim experience, with recliner and tilt forward facility you can tweak the adjustment to suit your racing needs. Black Composite Backrest, dual sided recline and tilt forward facility, orthopaedic backrest and lumbar support, integral headpad and shoulder supports, unique one-piece harness support slot, four-point harness facility and Silver Powder coated Side Mechanisms. The Anniversary Edition offers a lightweight pure carbon fibre back and is upholstered in soft grain black nappa leather with a unique contrast Vesaro yellow diamond stitching to compliment.

### **Vesaro Signature Cobra Evolution Technology Carbon & GT**

Evolution Technology Carbon - £1,749

Evolution Technology Carbon GT (Extra Wide) - £1,789

The Cobra Evolution Pro provides an authentic racing experience for your sim racing, all our seats are genuine Cobra seats. GT version provides 40mm extra width. The Technology Carbon edition is a full carbon fibre racing seat with alcantara, leather inserts and contrasting diamond stitching.

## Vesaro Chassis Upgrades

The Vesaro Chassis upgrades bolt right onto the existing frame and introduce a lot more control mounting options - if using a control system that requires a chassis upgrade please see from the available products below.

### **Control Arm System**

The Control Arm System mounts directly to the Pro Steering Plate product positioning two Control Plate Plus (included in the kit) control plates directly next to the steering wheel position making it ideal for rally or other applications.

£300

### **Control Plate Plus**

The Control Plate Plus is designed for the Fanatec Clubsport SQ Shifter, Thrustmaster Warthog Throttle, Third Parts Handbrakes and the Vesaro Button Box. This can also be used for mounting any other oversized control units, please contact us for compatibility.

£150

£225 (Dual Control Plate Plus)

### **Pro Steering Plate**

The Pro Steering Plate provides compatibility for a wider range of Pro Controls systems and offers support for the Control Arm System product, adjustable mounting positions allow wheel position to be set up to user's preference.

£150

### **Control Plate Plus Dual Combined**

The Control Plate Plus Dual Combined offers compatibility for the same controls as the control plate plus but has an additional tier allowing for a perfectly position rally sequential shifter or handbrake.

£250

£375 (Control Plate Plus Dual Combined – Both Sides)

### **Seat Side Control Bracket**

The Seat side control bracket mounts directly to the seat side giving a comfortable and realistic mounting point for a handbrake.

£150

£275 (Seat Side Control Bracket – Both Sides)

## **Vesaro Seatbelts**

### **Seat Belt – 4 Point Racing Hardness Level 1**

Add a four-point racing harness to your Vesaro Simulator, giving it that edge of authenticity and holding you tight to the bucket seat for extra control and stability.

£149

## **Vesaro VR Headsets**

Step into a world of virtual reality with an Oculus Rift CV1 or HTC Vive headset, giving you a next-level experience and putting you right into the cockpit of a race car. Use Virtual Reality to step even closer to the track and get a full 360-degree view of objects and scenery around you. You can switch between virtual reality and the traditional display seamlessly for a combination of both.

**Vesaro VR Headset – Oculus Rift CV1**

£1,249

**Vesaro VR Headset – HTC Vive**

£1,499

## Vesaro Display Stands

Use the Vesaro Display Stands with your Vesaro Simulator, or for general home/gaming use – with standard vesa mounting points and full adjustability, this is a multi-purpose display stand. See the full range below.

### **Rig Mounted Display Bracket**

The Vesaro Rig Mounted Display bracket bolts right to the nose of your Vesaro Simulator, providing optimal display positioning for static rigs.

£249

### **Single Display Stand**

The Vesaro Single Display Stand is designed for your Vesaro Simulator as well as general gaming, comes with full height adjustment and lateral angle adjustment to position your display perfectly.

£499

### **Triple Display Stand**

The Vesaro Triple Display Stand is designed to hold 3 TVs up to 50" in size, with full angle adjustment and height adjustment.

£849

### **Triple Display Stand Plus**

The Vesaro Triple Display Stand Plus allows you to mount 3 TVs up to 55" in size, with full angle and height adjustment.

£1,199

### **Triple Display Stand Oversize**

The Vesaro Triple Display Stand Oversize utilises three single display stands in a triple formation giving support for TVs up to 65 inches in size, with cable management and height adjustment.

£1,497

# Vesaro Displays

We offer a wide variety of displays to provide solutions for every simulation requirement, ranging from single 27" displays for a small-footprint home simulation set-up or a triple 65" curved 4k display set-up for professional training/commercial usage. See the full range below.

On  
£199

## Level 2 – Clubsport Controls

Level 2 Controls feature the Fanatec Clubsport range which provide a range of interchangeable rims on a belt-driven, versatile force feedback system with virtually no lag or dead-zone giving a responsive and realistic driving experience.

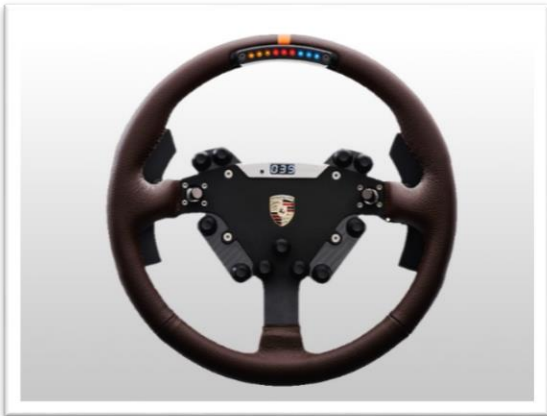

### **Clubsport V2 – Wheel Base**

Fanatec Clubsport – Wheel Base EU (Wheel not included)  
plus Cable Extension and Hardmount Kit

£699

## Level 2 – Clubsport Rims

Clubsport Rims are designed to fit the Wheel Base product Clubsport EU Base.

**ClubSport Porsche 918 RSR EU Rim - £549**

**Clubsport Formula Rim - £268**

**Clubsport BMW Rim - £375**

## Pedals

Below are the pedal options available, ranging from the Clubsport Pedals V3 with a full metal construction and a selection of adjustable features to the fully commercial grade hydraulic Pro Control V-Spec Pedals.

---

### **Clubsport Pedals V3**

Clubsport Pedals V3 + Cable Extension and Hardmount Kit  
£375

---

### **Pro Controls Pedals**

Pro Controls Pedal System with Accelerator,  
Brake and Clutch – Commercial Duty System,  
Fully Adjustable, Standalone USB  
£1,149

---

### **Pro Controls V-Spec Pedals**

Pro Controls V-Spec professional racing pedals  
designed for enthusiast sim racers, professional race  
driver training and commercial use.  
£1,199

---

### **Pro Controls V-Spec Hydraulic Pedals**

Pro Controls V-Spec Hydraulic pedals are commercial grade  
professional pedals with full hydraulic operation of all three  
pedals for the ultimate pedal feel.  
£1,499

## Gearsticks

Gear shifters require a rig with a Gearstick Control Arm chassis upgrade. The Clubsport SQ shifter requires the "Vesaro Control Plate Plus", ensure to select this from the below category. The Pro Controls V-Spec Sequential shifter requires a Dual Control Plate Plus System chassis upgrade. (If you are configuring with two gearstick controls please add either a Dual Gearstick arm setup or a Dual Control Plate Plus system. If you are configuring with 3 or 4 gear controls, you will require a Dual Gearstick Arm rig combined with both Left and Right Side Dual Control Plate Plus System chassis upgrades.

### **Logitech Driving Force Shifter**

Logitech Driving Force Shifter for the Logitech G29 & G920 Wheel, 6 Speed H Pattern Shifter with push down reverse gear. Support Xbox One, PS4 and Vesaro PC.

£75

### **TH8A Shifter + Cable Extension Kit**

TH8A Shifter with 7 speed and sequential modes. (requires removal and swap of plate for each mode)

£130

### **Clubsport SQ Shifter + USB Adaptor**

The Clubsport Shifter SQ features both the H-Pattern and sequential modes changeable at the flick of a switch. Also includes: Cable Extension Kit and Hardmount Kit.

£325

### **Pro Controls V-Spec Sequential Shifter**

Commercial grade sequential shifter with 3 buttons, toggle switch and rotary switch.

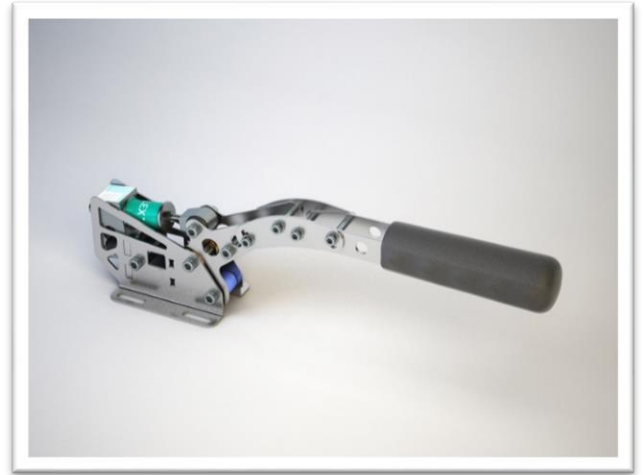

£949

## Handbrakes

Hand brakes require the Seat Side Control Bracket product.

**Clubsport Handbrake - £349**

**Pro Controls V-Spec Handbrake - £599**

## Button Boxes

Button Boxes give you the option to assign any software controls you wish to the push of a button, allowing you to quickly change traction control settings, brake bias settings, windscreen wipers and various other controls you may require.

### **Vesaro Button Box V-Spec**

Premium grade Vesaro Button Box constructed using Aircraft-grade Aluminium and genuine Carbon Fibre face plate. The control box features heavy duty high quality buttons and switches. 10 push, 3 rotaries and 4 toggle switches.

£795

## Flight Controls

Add Flight Controls to your Vesaro Racing Simulator for the ultimate in versatility. Don't forget to add your Flight Simulation Software when configuring a Vesaro PC. (For more advanced flight control systems please see the dedicated Flight Simulators on the Vesaro website)

### **Flight Controls Fighter Pack**

Flight control replica of the U.S. Air Force A-10C attack aircraft which can be used with any PC flight sim software.  
£599

## Consoles

Console systems are an affordable way to enter the Sim Racing market but restrict you in various areas such as motion technology, advanced control systems and triple screen setups – see Vesaro PC Systems for full compatibility.

**Console PS4**  
£539

**Console XBOX One**  
£539

## Vesaro PC Systems

Vesaro PC systems are custom designed and built for advanced simulation and extreme gaming. Our custom Vesaro built systems use only the best industry leading components and are designed to ensure future proof compatibility with the Vesaro simulation system. We do not use cheap components to try and compete on price with PC builder companies, our systems use only the best components tailored to provide the ultimate performance and reliability for simulation based use.

Our systems are designed with a minimalist stylish design.

Every system supports triple display output at Full HD 1080p resolution and comes pre configured for the Vesaro motion systems D-Box motion code. In addition all systems come with a dedicated Soundblaster Z sound card offering true digital surround sound when linked to the 5.1 surround sound audio systems that are available with our rigs. Wireless networking/broadband connectivity also ensure that your Vesaro rig is not tied down.

In addition our PC's include a 500gb external USB backup hard drive preloaded with a full image restore of your system ready when it was delivered to you.

### **Vesaro PC Level 1**

## Vesaro Audio and Tactile Feedback

### **Audio System**

THX-Certified 5.1, delivers 500 watts (RMS) of theatre-quality sound and designed to fit perfectly to the Vesaro rig system using our custom designed bracket set. Featuring Digital and analogue inputs, an easy-to-read-and-stack control console and a wireless remote. The ported, side firing Subwoofer adds an essential depth to the tactile feedback system when used in conjunction on the Vesaro rig system.

£449

### **Tactile Feedback System**

The Vesaro Tactile Feedback System is a silent subwoofer that delivers powerful tactile feedback to your Vesaro rig, when used in conjunction with our custom bracket the advance unit delivers feedback through your whole body, in the same way as you would get in a real car, not just the occasional vibration in the seat as is found with smaller units.

£649

### **Wireless Headphones – 5.1 Surround Sound**

Wireless Surround Sound headphones which can be used In addition to the standard Audio System or instead of.

£349

## Vesaro Motion Systems

Motion editing is a new art form, a new sophisticated discipline where art meets technology meets gaming. It leads to the rise of MFX, a multi-sensorial revolution in gaming. Action becomes motion. Sounds become motion. Events become motion. Brace yourself for an entirely new, unforgettably immersive experience. A Patented, Award-Winning Technology - All of this is made possible by the patented, award-winning technology. MFX uses 3 types of intelligent movement (subtle pitch, roll and heave) to move you forwards and backwards, from side to side and up & down. Combine that with the D-BOX-encoded intelligent vibrations and it all comes together to create the most amazing, all-encompassing simulation experience ever.

The DBOX motion technology uses electrical movement providing an ultra-reliable system with zero maintenance, a refined and highly developed system providing training spec motion ability and the highest number of supported games and simulation titles of any motion system available on the market today.

### **Vesaro Dual Motion 1.5**

£5,495

Maximum lifting capacity (per actuator) 250 lb 114 kg  
Maximum lifting capacity (per seating area) - Dual Motion 1.5 - 2 actuators system: 500 lb / 227 kg  
Dual Motion 1.5 - Power Requirements 120VAC, 60Hz, 2.5 A or 230VAC, 60 hZ, 5A  
1.5"/3.8 cm stroke length  
Max Vertical Velocity  $\pm 100\text{mm/sec}$   
Max Vertical Acceleration  $\pm 1g$   
Pitch & Roll  
Operating Temperature range - 0 to 40 °C  
Operating Humidity - 10 to 75 %

### **Vesaro Tri Motion 1.5**

£7,995

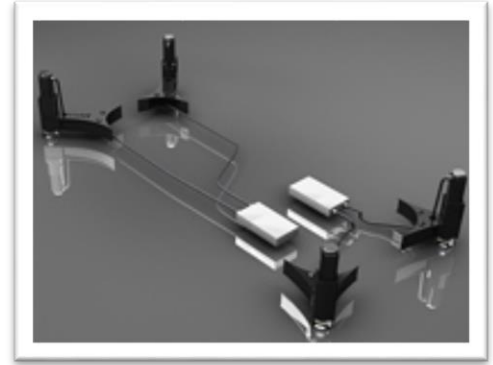

3 actuators system: 750 lb / 341 kg  
Power Requirements 120VAC, 60Hz, 3.5 A or 230VAC, 60 hZ, 2A  
1.5"/3.8 cm stroke length  
3 DOF Pitch, Roll and Heave  
Max Vertical Velocity  $\pm 100\text{mm/sec}$   
Max Vertical Acceleration  $\pm 1g$   
Operating Temperature range - 0 to 40 °C  
Operating Humidity - 10 to 75 %  
Tri Motion 1.5 - 3 actuators system: 750 lb / 341 kg  
4 actuator system: 1000 lb / 455 kg

### **Vesaro Quad Motion 1.5**

£9,995

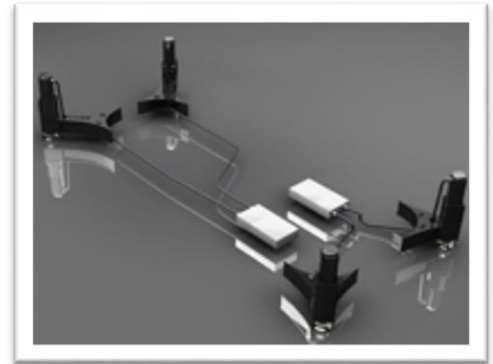

4 actuators system: 1000 lb / 455 kg  
Power Requirements 120VAC, 60Hz, 5 A or 230VAC, 60 hZ, 2.5A  
1.5"/3.8 cm stroke length  
3 DOF Pitch, Roll and Heave  
Max Vertical Velocity  $\pm 100\text{mm/sec}$   
Max Vertical Acceleration  $\pm 1g$   
Operating Temperature range - 0 to 40 °C  
Operating Humidity - 10 to 75 %

### **Vesaro Quad Motion V-Spec 3.0**

£19,495

456 KG/1000 Lbs Lift Capacity  
3 DOF Pitch, Roll and Heave  
3-inch stroke length, 3 DOF (pitch, roll and heave)  
Max Vertical Velocity  $\pm 100\text{mm/sec}$   
Max Vertical Acceleration  $\pm 1g$   
Frequency Range 0-100Hz  
Operating Temperature range - 0 to 40 °C  
Operating Humidity - 10 to 75 %  
Power Requirement 120 VAC. 60Hz, 5A / 230 VAC, 60Hz, 2.5A

### **Vesaro Motion System - V-Spec 6.0**

£27,995

908 KG/2000 Lbs Lift Capacity  
3 DOF Pitch, Roll and Heave  
6-inch (15cm) stroke length)  
Max Vertical Velocity  $\pm 100\text{mm/sec}$   
Max Vertical Acceleration  $\pm 1g$   
Frequency Range 0-100Hz  
Operating Temperature range - 0 to 40 °C  
Operating Humidity - 10 to 75 %  
Power Requirement 120 VAC. 60Hz, 10A / 230 VAC, 60Hz, 5.5A

### **Motion Software Support**

#### **Racing**

- ACTC
- ARCA Sim Racing
- DiRT, DiRT 2, DiRT 3, Dirt Rally
- F1 201, F1 2011, F1 2012, F1 2013, F1 2014, F1 2015, F1 2016
- Formula RaceRoom
- Game Stock Car
- GP Bikes
- GRID (Req. 1.3)
- GRID 2
- Grid Autosport
- GT Power

- GTR Evolution (Req. 1.2.0.8)
- iRacing
- Kart Racing Pro

- RACE On
- Raceroom/DTM Experience
- Retro Pack
- rFactor, rFactor 2
- SHIFT 2 Unleashed
- Simraceway
- STCC - The Game (Req. 1.2.0.8), STCC - The Game 2
- Superleague Formula
- TC2000 Racing
- Test Drive Unlimited 2
- Top Race
- Truck Racing by Renault Trucks
- Virtual Grand Prix 3 (Req. 0.81)
- World Racing Series
- WRC FIA World Rally Championship (Req. 1.01)
- WRC FIA World Rally Championship 2
- WTCC 2010
- X-Motor Racing

### **Flight Simulator**

- DCS: Black Shark (Req. 1.0.1)
- IL-2 Sturmovik 1946
- Lockheed Martin Prepar3D
- Microsoft ESP, Microsoft Flight Simulator X
- X-Plane

### **First Person Shooter**

- Battlefield 2 (Req. 1.41 or 1.50 Retail only)
- Crysis WARHEAD

## Vesaro Accessories

Cables, Electronics and various other accessories relevant to the Vesaro I Simulator.

**Wireless Keyboard and Mouse**

£70

**Combined Event Wireless Keyboard and Mouse**

£70

**Power Kit**

£75

**Cable and Adaptor Kit – Single Display Stand**

£95

**Tactile Feedback System Electronics Kit**

£145

**Cable and Adaptor Kit - Triple Display Stand**

£195

## Vesaro Assembly and Mobility Upgrades

Below is our range of assembly and mobility aids that help to transport the simulator, whether you are using it commercially or just moving it around at home.

**Vesaro Rig Lifter**

£299

### Vesaro Van Ramp

£1,195

### Event Mobility Trolley Vesaro Simulator

£1,500

## Vesaro Software Options

Below is an introduction to Vesaro Software Options, for full coverage please see: Vesaro Software Options 2017.

### **iRacing**

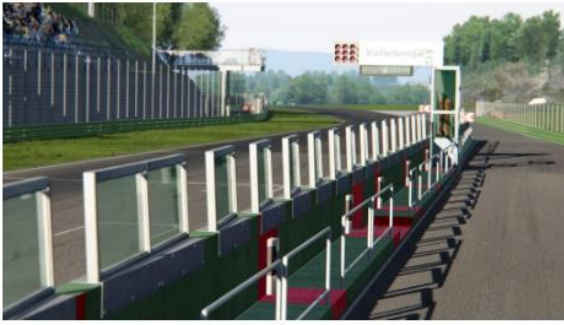

Hardcore Simulation racing for professional style racing and simulation based physics. See below for detailed info of content that is included. Iracing 1 Year Membership including 55 Cars and 77 Tracks. - Unlimited racing against real people from around the world in official series. - Over 40 official Series, Over 400 private leagues. - Full racing and website functionality including ghost racing, stats, teams, etc. - Access to over 120 laser scanned cars and tracks. -

Access to full racing licensing and rating system. - Mixed class racing, open setup racing, team racing, league racing, private racing. - Time trialling, open practice, special racing events. - Hosted/Tournament racing. - Full member forum access. - World class customer support. - 24/7 live online racing, centralized service & community, - always find a race. - 70 + laser scanned officially licensed tracks mirrored after world. - Over 50 lasers scanned officially licensed racing cars. - Officially sanctioned and licensed NASCAR, Indy Car, GRAND-AM, Aussie V8, Super GT. - A racing community of over 40,000 of like-minded racers Constant content, improvements and features added with one click updates. - Endorsed by professional drivers from every major racing series from around the world.

## Assetto Corsa

Assetto Corsa features a stunning graphics engine, Realistic car physics and an impressive roster of cars and tracks.

## Project Cars

Cutting edge simulation game with realistic physics and a stunning weather effects engine.

110+ courses in 30 unique locations

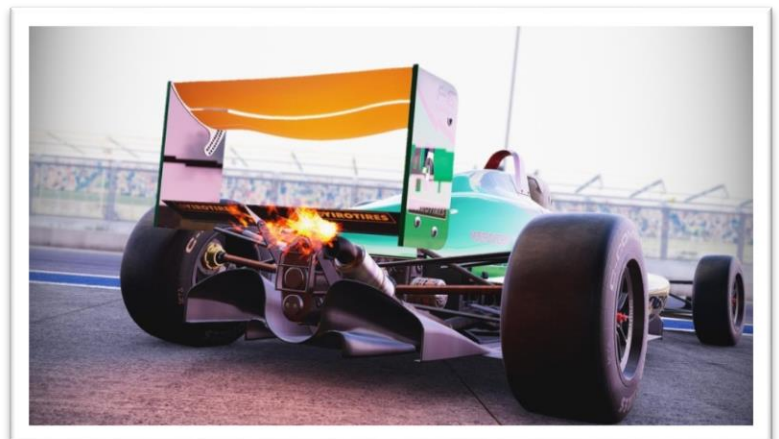

A wide variety of motorsports including GT, Touring, Le Mans Prototypes, Karts, and modern Open Wheel and 80+ cars available at launch

Dynamic weather, pit stops, and pit strategy creation

Dynamic time of day and endurance races including the Le Mans 24H

World-class graphics with up to 45 drivers onscreen

Next-gen physics running at 600 fps and deep telemetry & tuning features

Competitive multiplayer for up to 16 players and the ability to create public, private and friend-based lobbies with 'Join in Progress'

Asynchronous Time Trial with downloadable ghosts

Regularly-scheduled community events

Social connectivity with photo and replay modes powered by The Driver Network

### **Dirt Rally**

Dirt Rally is the most authentic rally software available allowing you to drive on the edge of vehicle physics and put your skills to the ultimate test in Rally, Rallycross and Hillclimb modes.

Dirt Rally allows you to drive a wide selection of cars in a huge variety of extraordinary locations, including the all famous Pikes Peak in USA.

This software allows you to race in competitive championships; intense multiplayer online events; and fully customisable racing leagues.

### **Grid Autosport**

Grid Autosport provides an authentic feel to vehicle handling and features a wide range of cars and locations to race in by yourself, against other real-life drivers or realistic AI if you want to train wheel-to-wheel against advanced motorists.

Grid Autosport offers over 100 different routes in 22 unique locations – giving you the option on where and how you want to train your driving skills.

## F1 2016

F1 2016 gives you the most up-to-date and realistic experience of one of the most advanced motorsports in the world, allowing you to compete as some of the most competent drivers on the globe in the racing league.

You are given the complete experience of the Formula 1 World Championship with a thorough career mode taking you through all the racing circuits; all the vehicles; and all the drivers in F1.

## rFactor 2

Highly regarded physics engine and modding capability to add tracks and cars created by the community

Current car list for Rfactor 2 - <http://rfactor.net/web/rf2/cars/>

Current track list for Rfactor 2 - <http://rfactor.net/web/rf2/tracks/>

Mod add-ons available from the community for 2 for private use only can be found here

<https://www.rfactorcentral.com/rfactor2/list.cfm?cat=Cars&type=All>

## **Additional Services**

### **On Site Services Provided by Vesaro**

(Includes all travel, accommodation and expenses for our two-man team)

Overseas - On-Site Install, Configuration & Training service - Installation of rig and all included systems. Full test, optimization, demo and basic training. 1-2 days' total time. - £5995

On-Site Install - each additional simulator on bulk order - Configuration & Training service - £750

### **Optional Hardware Maintenance Contract**

- Price per month & Per Simulator on-site Service agreement - £500 (Excludes travel/Expenses)
- On site maintenance and support
- Includes free parts and labour of any failed hardware components (within warranty) and labour on new/replacement parts.
- Remote support if issue can be fixed without visiting your home/facility.
- Agreement term 1 year
- 2 on-site visits permitted per calendar month - UK
- 1 on-site visits permitted per calendar month - Overseas (in relation to Vesaro UK Headquarters)

### **Optional Software Maintenance Contract**

- Price per month & Per Simulator On site/Remote Service agreement - £500 (Excludes travel/Expenses)
- On site maintenance and support of PC system and all included software.
- Includes free restoration of system if required.
- Includes quarterly software updates with new content and games.
- Remote support if issue can be fixed without visiting your home/facility.
- Agreement term 1 year
- 2 on-site visits permitted per calendar month - UK
- 1 on-site visits permitted per calendar month - Overseas (in relation to Vesaro UK Headquarters)

## **Bespoke services**

Custom design & fabrication, Custom seat logo embroidery and vinyl stickers; for bespoke commercial builds

## **Assembled Dimensions & Weights (Dimensions in mm)**

### **Static non-motion rig & Seat:**

Dimensions - 1870 Length x 699 Width x 719 Height

Dimensions - 1870 Length x 699 Width x 1200 Height with Seat attached.

Weight - 81.9KG (without seat 68.7KG)

### **Twin motion rig & Seat:**

Dimensions - 1940 Length x 825 Width x 719 Height

Dimensions - 1940 Length x 825 Width x 1200 Height with Seat attached.

Weight - 110.5KG

### **Quad motion rig & Seat:**

Dimensions - 1940 Length x 825 Width x 719 Height

Dimensions - 1940 Length x 825 Width x 1200 Height with Seat attached.

Weight - 132.7KG

### **Triple Display Stand:**

Dimensions - 700 Length x 2030 Width x 1260 Height - No Screens attached (Outer arms set to 63 degrees)

Dimensions - 700 Length x 2030 Width x 1340 Height - 46" LED screens attached (Outer arms set to 63 degrees)

Weight - 46.3

## **Shipping**

### **Self Assembly Systems - Cardboard box:**

For All Systems - 1270 L x 780 W x 870 H

For All Systems + addition of Free Standing Single or Free Standing Triple Display Stand - 1515 L x 780 W x 1170 H

### **TurnKey Pre-Assembled Systems - Wooden Crate:**

Static rig - **1880 L x 900 W x 1000 H**

Dual, Tri or Quad Motion rig - **2000 L x 1350 W x 1350 H**

Dual, Tri or Quad Motion rig + addition of Free Standing Single or Triple Display Stand - **2120 L x 1460 W x 1600 H**

## **FAQ – Got a question?**

### **Does it work with PS3, XBOX, PS4 or XBOX One?**

Consoles are supported for our static systems; a PC is required for any of our simulators that have a motion system included in the configuration. In addition, consoles, do not support triple display from a single console. You can select any system without motion and triple display and can then use with consoles. Consoles also have limited controller support so only a few specific wheels' support consoles. Visit the Vesaro I Gamer category for pre-configured setups for consoles.

### **Can I fit any screen size for your triple display stand setup?**

Our Triple Display Stand product features a unique slide and rotate mechanism which allows screen sizes from 27" to 50" to be used in triple formation, the mechanism allows perfect alignment of the outer screens with the centre screen. If you want to use 55" tv's or particularly heavy or older TV's with the standard Triple Display Stand product, then you must add the Triple Display Stand Plus Kit product which will add additional support arms to allow the extra weight. We also offer the Triple Display Stand Oversize product which supports 55" and bigger. (tv's with 400 x 400 vesa mount)

### **Can I use a 65-inch display?**

Yes, our product, the "Triple Display Stand Oversize" supports 65 inch displays in triple formation or our "Single Display Stand" product supports it in single setup.

### **Can I adjust the pedal plate?**

Yes, the pedal plate can be adjusted forwards and backwards using a quick release slider system and tilts up and down to suit different pedal set angles and user preference.

### **Can the seat height be adjusted?**

Yes, there are three height adjustments which also allow the seat to be tilted forwards or backwards using the different bolt positions. We also offer a full recliner seat option, the Cobra Misano S.

### **Is the Simulator ready to go out of the box?**

We offer two types of configuration, Self-Assembly or Pre-Assembled/Factory Assembled, Self-assembly comes in a kit form with all the parts, cables, etc. in flat pack form requiring complete assembly of the simulator. Pre-Assembled comes in a Plug and Play fully assembled format in a wooden shipping crate, you will only need to attach the TV's and plug the Audio system and power in.

### **Can you ship it to me by Sea Freight to make it more affordable?**

Yes, we can ship by sea, contact us for a quotation. Sea freight takes up to 4 weeks.

### **How many degrees of motion does your motion system offer?**

We offer 5 different motion system options, the Vesaro Dual Motion 1.5 offers 2 Axis and all our other systems offer 3 Axis motion. the systems that offer 3 Axis of movement include the Vesaro Tri Motion 1.5, Vesaro Quad Motion 1.5, Vesaro Quad Motion V-Spec 3.0 and the Vesaro Quad Motion V-Spec 6.0.

### **Does the motion system use hydraulic fluid?**

No, the motion technology is electronic providing an ultra-reliable zero maintenance product built to commercial grade standard.

**Do you ship internationally?**

Yes, we ship all over the world.

**Can you install the simulator at my home or business?**

Yes, we can send our team of technicians to install the simulator onsite, we will even unpack the crate for you, setup in the location of your choice and provide training on how to get the best from the system. (This service is an additional option)

**What is the Warranty?**

Our Simulators come with a 10 Year Chassis warranty and 2 Year electronics warranty.

**Do you offer remote PC login support?**

If you have purchased a Vesaro PC with your system, we offer remote PC login support and can remotely connect to identify and solve any possible issue that might occur.

**I already have a TV; can I use this instead of buying yours?**

Yes, this is the idea of our system, you can simply choose the parts you need. Some of our special edition packages come as a complete solution, but most our systems can be customized to allow you to simply uncheck the existing TV.

**What kind of power does a Vesaro simulator need?**

Our simulators run of a standard household plug socket. We can also provide our simulators in either 220V or 110V to suit your region.

**Do your motion systems need to be bolted down?**

No, our motion simulators are free standing and do not need to be bolted to the floor. However, if you want to bolt them down this is possible with our hard mount kit.

**I want to use on a cruise ship or Yacht, can I bolt the simulator down?**

Yes, we provide a custom hard mount bracket system for our simulators allowing you to fix to the floor. Ordinarily there is no need to bolt our simulators down but we understand that at sea the angles of the ship or boat can change dramatically making it essential to bolt the simulator to the floor.

**Can the simulator run fully automated for commercial applications?**

Yes, we offer a fully automated software solution that will automatically reset after each go and allows a pre-defined car, track and time per go.

**Can I adjust the intensity of the simulators various systems to suit different users?**

Yes, every system is adjustable, the 5.1 surround audio and tactile feedback can be adjusted or completely turned off, the motion can be adjusted using simply sliders to make it as intense or subtle as you like and the software can be tuned to suit different abilities.

**Can you customise the cars and tracks?**

Yes, we can provide full track and car customization allowing addition of custom branding on both.

**Is it possible to move the simulator by hand?**

Our non-motion systems can be easily moved by two people. Our larger motion systems we would recommend using our mobility kit which includes trolleys and pneumatic jack system that allows 1 person to move our biggest simulators safely and with very little effort.

**What makes Vesaro's motion technology industry leading?**

We combine D-BOX motion tech with our purpose-built motion platform offering the most versatile, reliable and authentic motion system in the market today. How can we make such claims? D-BOX technology has the largest software support of any system with over 65 titles available. The technology uses zero maintenance electronic actuators that can lift several times the weight of our simulator. Our system recreates the suspension travel of the vehicle, this is the correct way to simulate life motion and in addition we move the seat, wheel and pedals together, not just the seat like other systems, there are no tricks here, just correct recreation of motion to ensure muscle memory for training is relevant to your real-life racing. Other motion systems do not have the lift capacity of D-BOX and are only capable of moving the seat which also sits on a pivot with no lift movement.

**How many cars and tracks are available?**

With our open system and support for a huge range of software titles there are literally thousands of cars and tracks available across multiple disciplines, including Formula One, GT, Rally, Rally Cross, IndyCar, Oval, etc. Let us know your requirements and we can provide the most suitable software solution to suit your needs and track and car requirements.

## Vesaro Event Solutions

Vesaro offer high end experiential marketing solutions providing cutting-edge entertainment solutions that will make your company and brand the talk of the show. Our solutions include standalone simulator hire to full turkey solutions with on-site technical support and professional show staff. We have provided successful events for some of the world's biggest brands including LG, Monster Energy, Codemasters, Virgin Media, Hi-Sense, Force India and Jaguar.

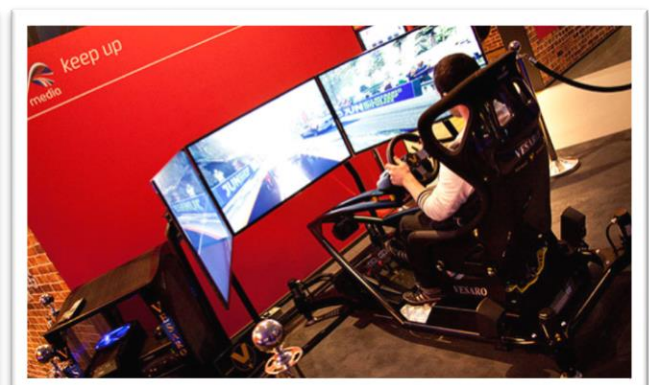

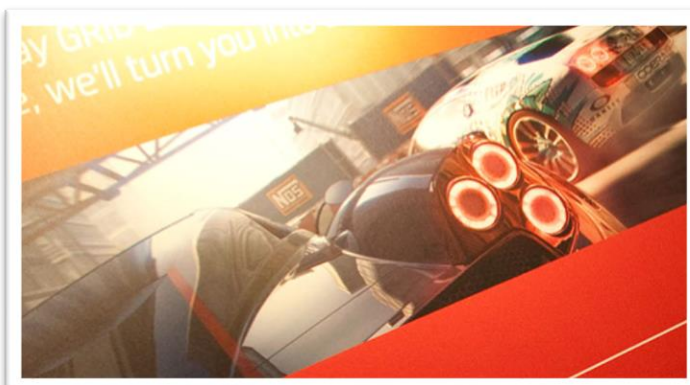

Ok, so why choose Vesaro to handle your event, there is only one chance to get it right and so much is invested, you can't delay an event if something goes wrong. We are not a traditional event company, as the manufacturer of the product we are putting our reputation on the line every time we put our product on the show-floor, as a result you won't find a typical run down, worn and often out of date simulator, often used by traditional event companies that made an initial investment in a simulator and need to work it off, we bring our top of the line showroom models which are constantly updated and in immaculate condition, they have to be, we are showcasing our products in a public arena.

In addition to the equipment we bring for turnkey solutions we send our best technicians who build the simulators meaning the best possible person is on hand on the rare occasion that an issue may arise. For standalone simulator hire all of simulators are prepped ready to go out of the box and our support technicians will be on hand to offer any advice or assistance. Vesaro also offers full entertainment staff to man the simulator, competitions and assist with the experience on offer, including professional models should you wish to add some glamour to the proceedings.

### Hisense at CES Las Vegas

### Grid 2 with Codemasters & Virgin Media at Eurogamer Expo
