

VESARO

The worlds most advanced simulators. Designed, engineered and built in England.

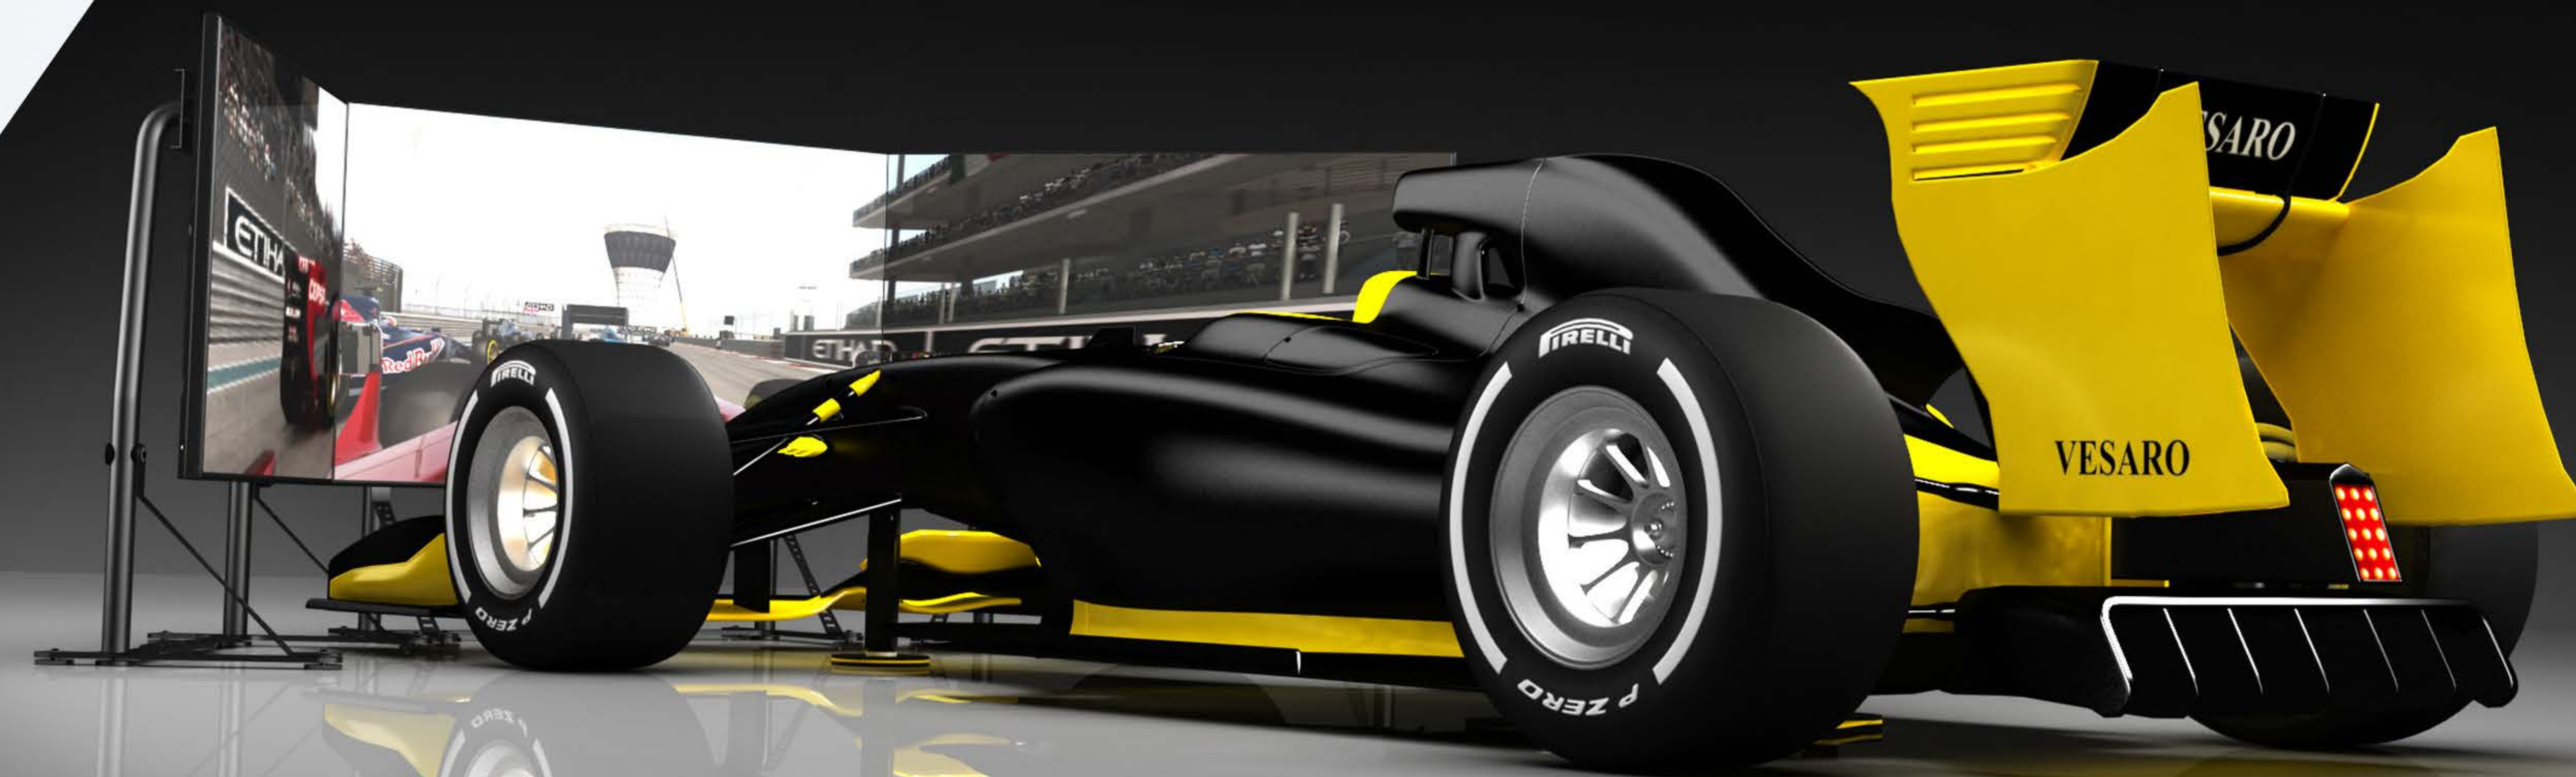

Introducing the **Vesaro Commercial Series**

The Vesaro Commercial series is designed to provide an immersive and entertaining virtual racing experience - all systems are built using high strength industrial grade components for continued use in commercial environments.

Build a system based around our Modular core chassis - with access to hundreds of optional upgrades to suit different driving disciplines and customer requirements.

Or choose one of our Formula Chassis', with half-size and full-size 1:1 scale designs available - offering an authentic F1 style driving position.

Integrate up-to 32 racing pods in a cutting edge multi-player Virtual Race Centre using our Venue Management System - providing complete remote control over an entire venue from one control station. Our Sim Centre Solutions also include a live leaderboard display and a live spectator display for additional customer entertainment.

Vesaro I Modular Commercial Series

The Vesaro I Modular Commercial Series features six stages of racing simulator, all designed to provide a cutting edge virtual racing experience - featuring industry leading racing controls, commercial software licensing and industrial grade components designed for heavy commercial use. All models in this range are based on our modular chassis architecture, so they benefit from access to our upgrade eco-system.

Vesaro I Modular Commercial Stage 1

Vesaro I Commercial Plug and Play Racing Simulator designed for use in commercial entertainment applications - offering a realistic and immersive virtual racing experience whilst also built with heavy duty industrial grade components for continued use in a commercial environment. In addition, our commercial simulators come pre-configured with commercial software licenses installed on one of our custom built Vesaro PC systems.

This Simulator comes with a 2 Year Commercial Use Warranty and is backed by our free 7 days per week Remote Log-in Assistance and Telephone Support.

- ♦ Vesaro I Chassis
- ♦ Vesaro I Modular GTF Conversion Kit
- ♦ Vesaro Pro Controls Dashboard
- ♦ Pedal Under Tray Storage system
- ♦ Vesaro Signature Cobra Evolution Pro GT
- ♦ Wireless Headphones - 5.1 Surround Sound
- ♦ Tactile Feedback System + TFS Wiring Kit
- ♦ Pro Controls Wheel Base V-Spec
- ♦ Pro Controls V-Spec - GT Wheel
- ♦ Pro Controls Pedals
- ♦ Vesaro PC Level 1
- ♦ Software - Commercial License - Assetto Corsa Commercial
- ♦ Cable And Adaptor Kit - Single Display Stand, Power Kit, Combined Event Wireless Keyboard and Mouse
- ♦ Rig Mounted Display Bracket
- ♦ HD Flat: Single Display Screen 40 Inch - Level 1
- ♦ Plug and Play Factory Assembly + Wooden Shipping Crate
- ♦ 2 Year Warranty, Vesaro Free Support

MORE DETAILS 

Commercial Software Licenses

Assetto Corsa

Assetto Corsa combines stunning graphics with a physics focused simulation engine - offering Solo racing and Multiplayer racing across a variety of driving styles and disciplines. This software platform is perfect for driver training and also entertainment. Lifetime Commercial License.

Assetto Corsa Pro

Pro version of the Assetto Corsa commercial license which allows the addition & customization of custom tracks and cars.

Rig Mounted Display Bracket (27" - 50")

Space saving display mounting solution that attaches directly to the nose of the Vesaro I Rig. Features a built in cable management and adjustable tilt angle. This display solution is perfect for mobile commercial users and those looking for a system with a compact footprint. Supports monitor sizes from 27" to 50" (For non-motion setups only)

Single Display Stand (27" - 65")

Free standing display stand with a design that allows it to be bridged over the top of the Vesaro I rig for complete control over the distance between the screen and your seating position. The screen height can be adjusted over a 15cm(150mm) range and the frame includes an integrated cable management system allowing routing of cables through the tubing for a clean and tidy setup. Supports monitor sizes from 27" to 65".

Triple Display Stand Compact (27" - 32")

Vesaro Compact Triple Display stand designed for cusotmers that require a compact footprint.

Allows mounting of multiple screen sizes in triple formation using a unique slide and angle adjust mechanism. Features outer screen angle adjustment, vertical height adjustment and cable management.

Supports triple 27" - 32" Displays with 75mm x 75mm and 100mm x 100mm VESA mounts.

Includes cable management

Example of the Triple display Stand Compact in use with 27" Monitors

Triple Display Stand (27" - 50")

Features a unique slide and rotate arm mechanism allowing different size displays to be perfectly aligned for triple screen viewing. The outer screen angles can be adjusted to suit your viewing preference and screen height can be adjusted over a 15cm(150mm) range. An integrated cable management system allows routing of cables through the tubing for a clean and tidy setup and a fold-away mechanism allows the outer screens to be folded inwards for storage and space saving when not in use. Supports monitor sizes from 27" to 50" in Triple Screen formation.

Triple Display Stand Plus (27" - 55")

The plus model is designed for heavy TV's and 55 inch screens. The plus model includes all of the great features of the standard Triple Display Stand product.

Triple Display Stand Oversize (55" - 65")

Designed for displays 65 inch and larger in triple formation. Features adjustable outer angles, cable management and height adjustment over a 15cm range. The stand is made up of three separate stands making transportation and storage easy

Virtual Reality Headset Display Solution - Varjo Aero

Varjo Aero professional standard Virtual Reality headset solution with 2880 x 2720 pixel resolution per eye

Add a VR headset to your Vesaro simulator for an immersive 3D visual experience that puts you directly into the cockpit. Built in headtracking allows you to move your head and see in the direction that you are looking.

Wearing a VR headset combined with selection of the helmet cam view in the software adds to the immersion by closely replicating the feeling and visual of wearing a real race helmet.

We offer VR as an add-on to existing single or triple display setups, providing you with the option of both

Vesaro Motion

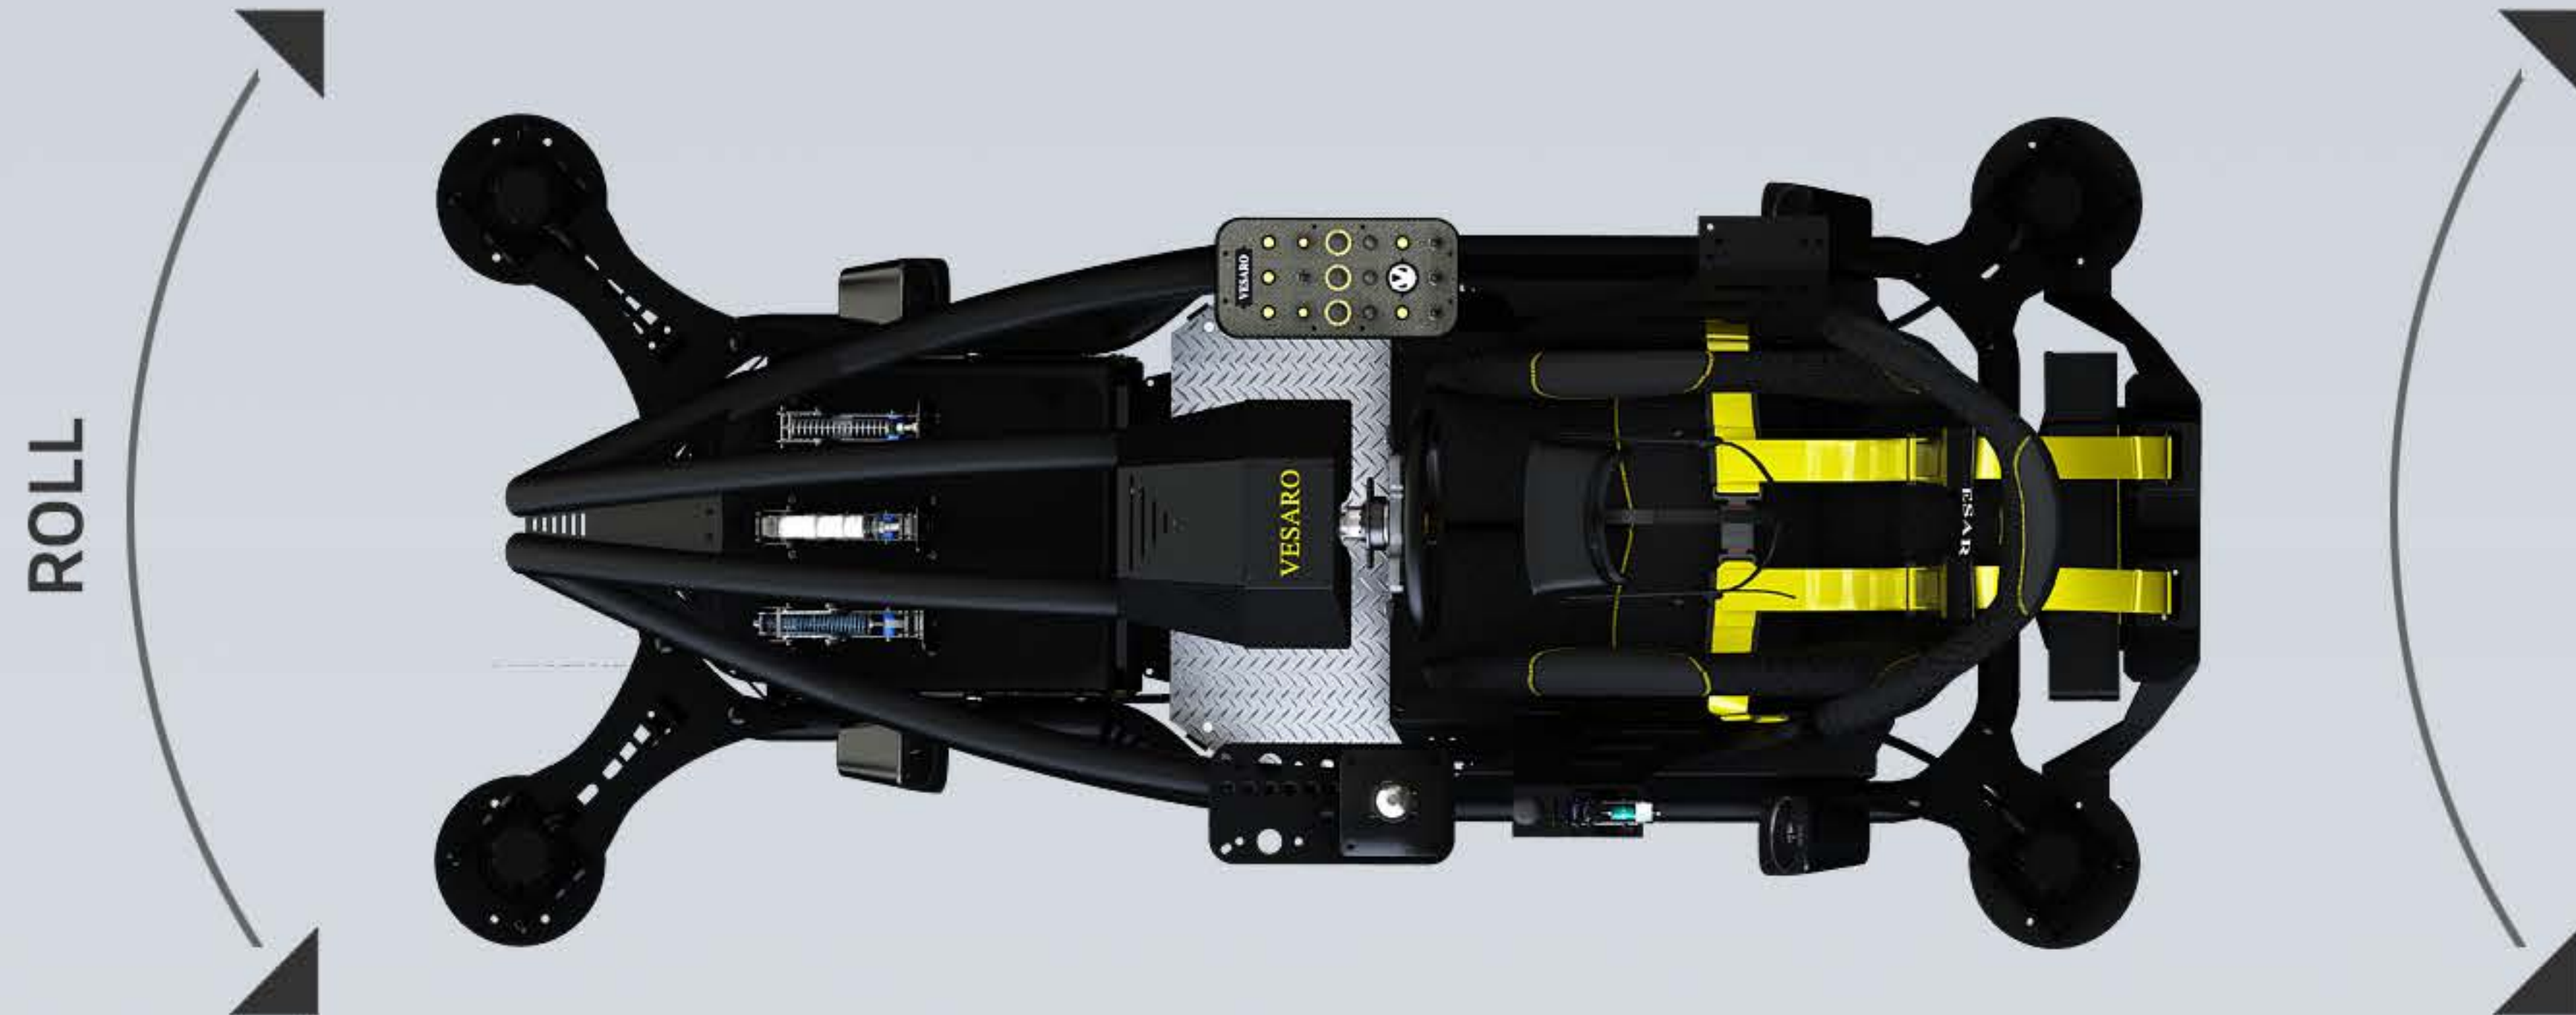

The FIA licensed D-BOX haptic technology offers Heave, Pitch and Roll movement, as well as multi position intelligent tactile feedback vibrations.

The haptic system provides full recreation of the suspension and vehicle movements of the real world equivalent race cars and the intelligent vibration replicates the road exture, engine vibration and other tactile sensations.

It is highly recommended to integrate a haptic platform to a commercial solution in order to offer maximum immersion and entertainment.

(Motion optional in some models)

D-BOX

On Board Audio

Our premium audio solution is a fully integrated on-board 5 speaker audio system featuring 4 satellite speakers powered by a high end Vibe amplifier and a low profile powered Alpine subwoofer with indepent bass remote control. The system is powered and ready to use as soon as you switch on your simulator and provides a clean and simple to setup audio solution with no componenents connected seperately to the simulator.

Mobile users will benefit greatly from this upgrade as it removes the requirement of having an external sound system.

Satellite Speaker

Satellite Speaker

Satellite Speaker

Vibe Amplifier

Low profile Alpine subwoofer

Satellite Speaker

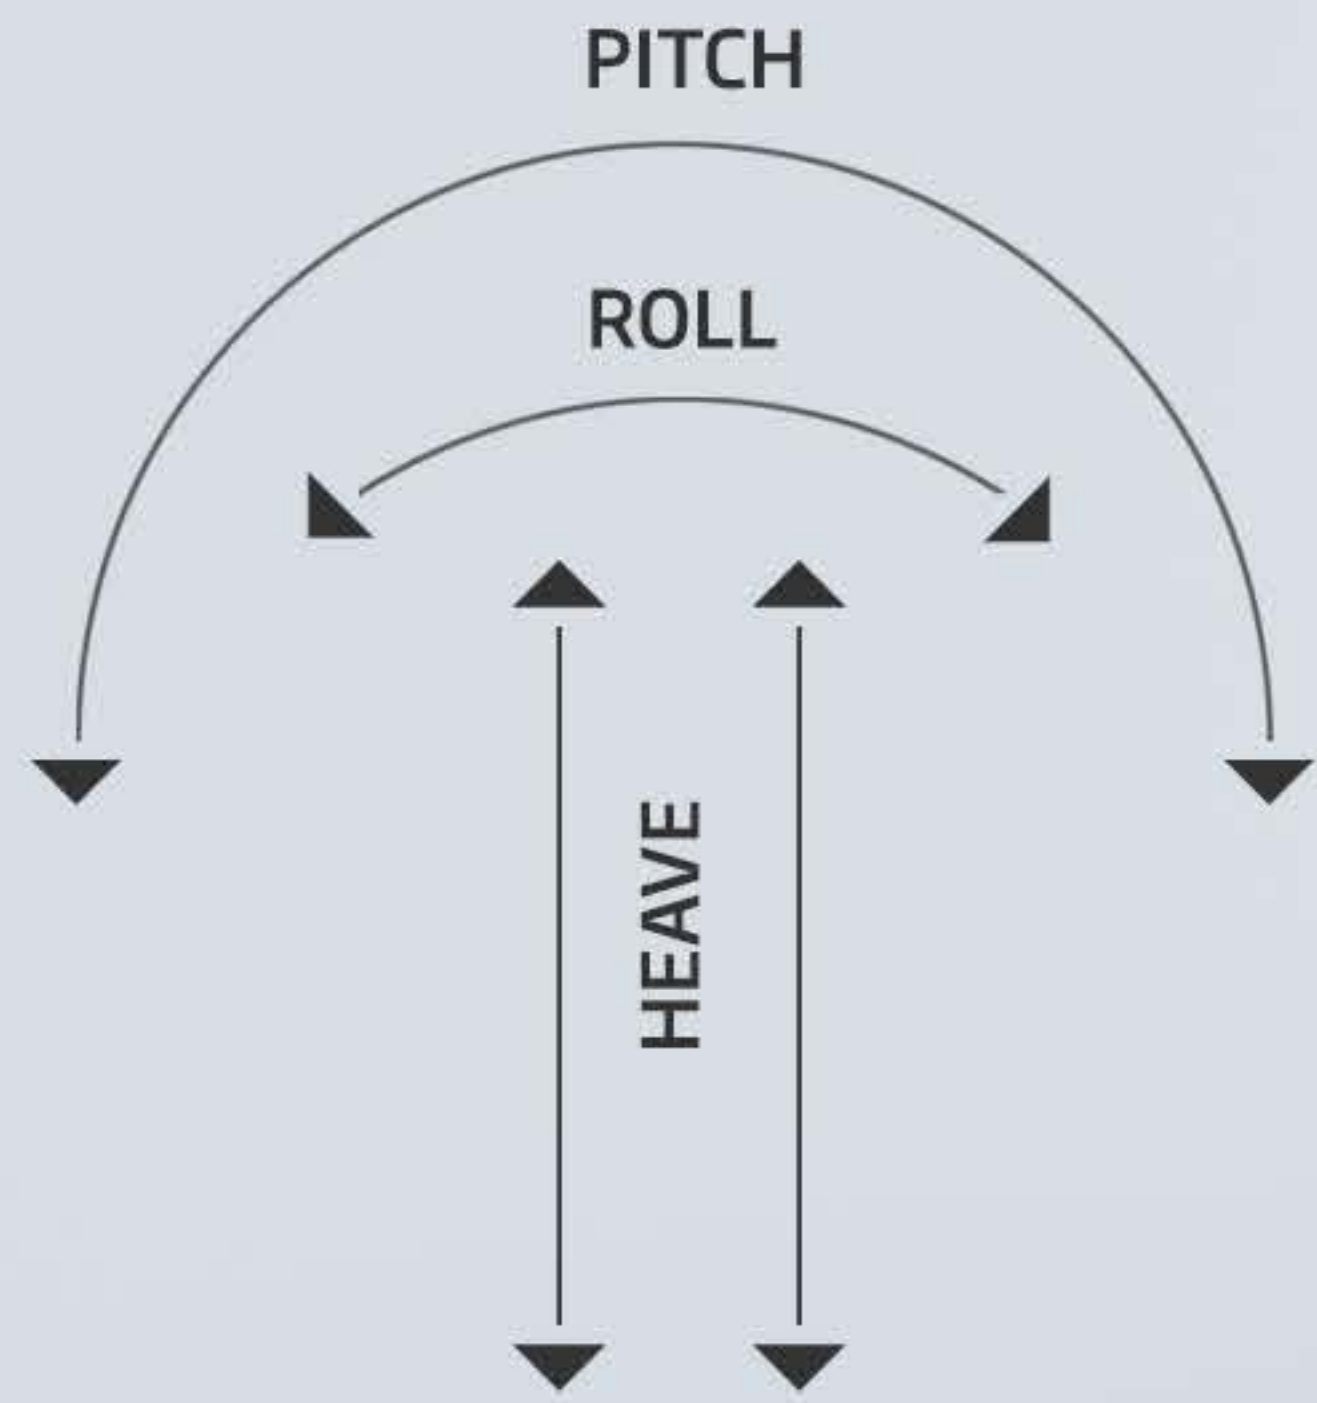

Seat Belt Tensioner G-Force System

G-Force seat belt tension system provides sustained G-Force effects under braking, the holy grail of motion g-force effects, an otherwise unobtainable G-Force feeling, resulting in accurate feedback through your body from the moment you apply the brake to the moment you lift off.

The system greatly increases immersion by applying controlled code based force on the seat belt harness under braking.

The system works in combination with our D-BOX haptic modules providing up to 3 axis force effects to the seat belt tensioner system, this results not only in braking forces being recreated, but also subtle cornering forces, impacts, curbs and gradient changes.

The integrated tensioner mechanism uses a rotating arm which allows the left and right shoulder harness of the seat belt system to move independantly accommodating cornering forces during motion roll. The rotating arm is connected to accurately tensioned springs providing a progressive feel as the g-force effect is applied to your body.

- PITCH = Sustained Braking G-Force
- ROLL = Cornering G-Force effects
- HEAVE = Curbs and track elevation changes
- COMBINED = General force effects

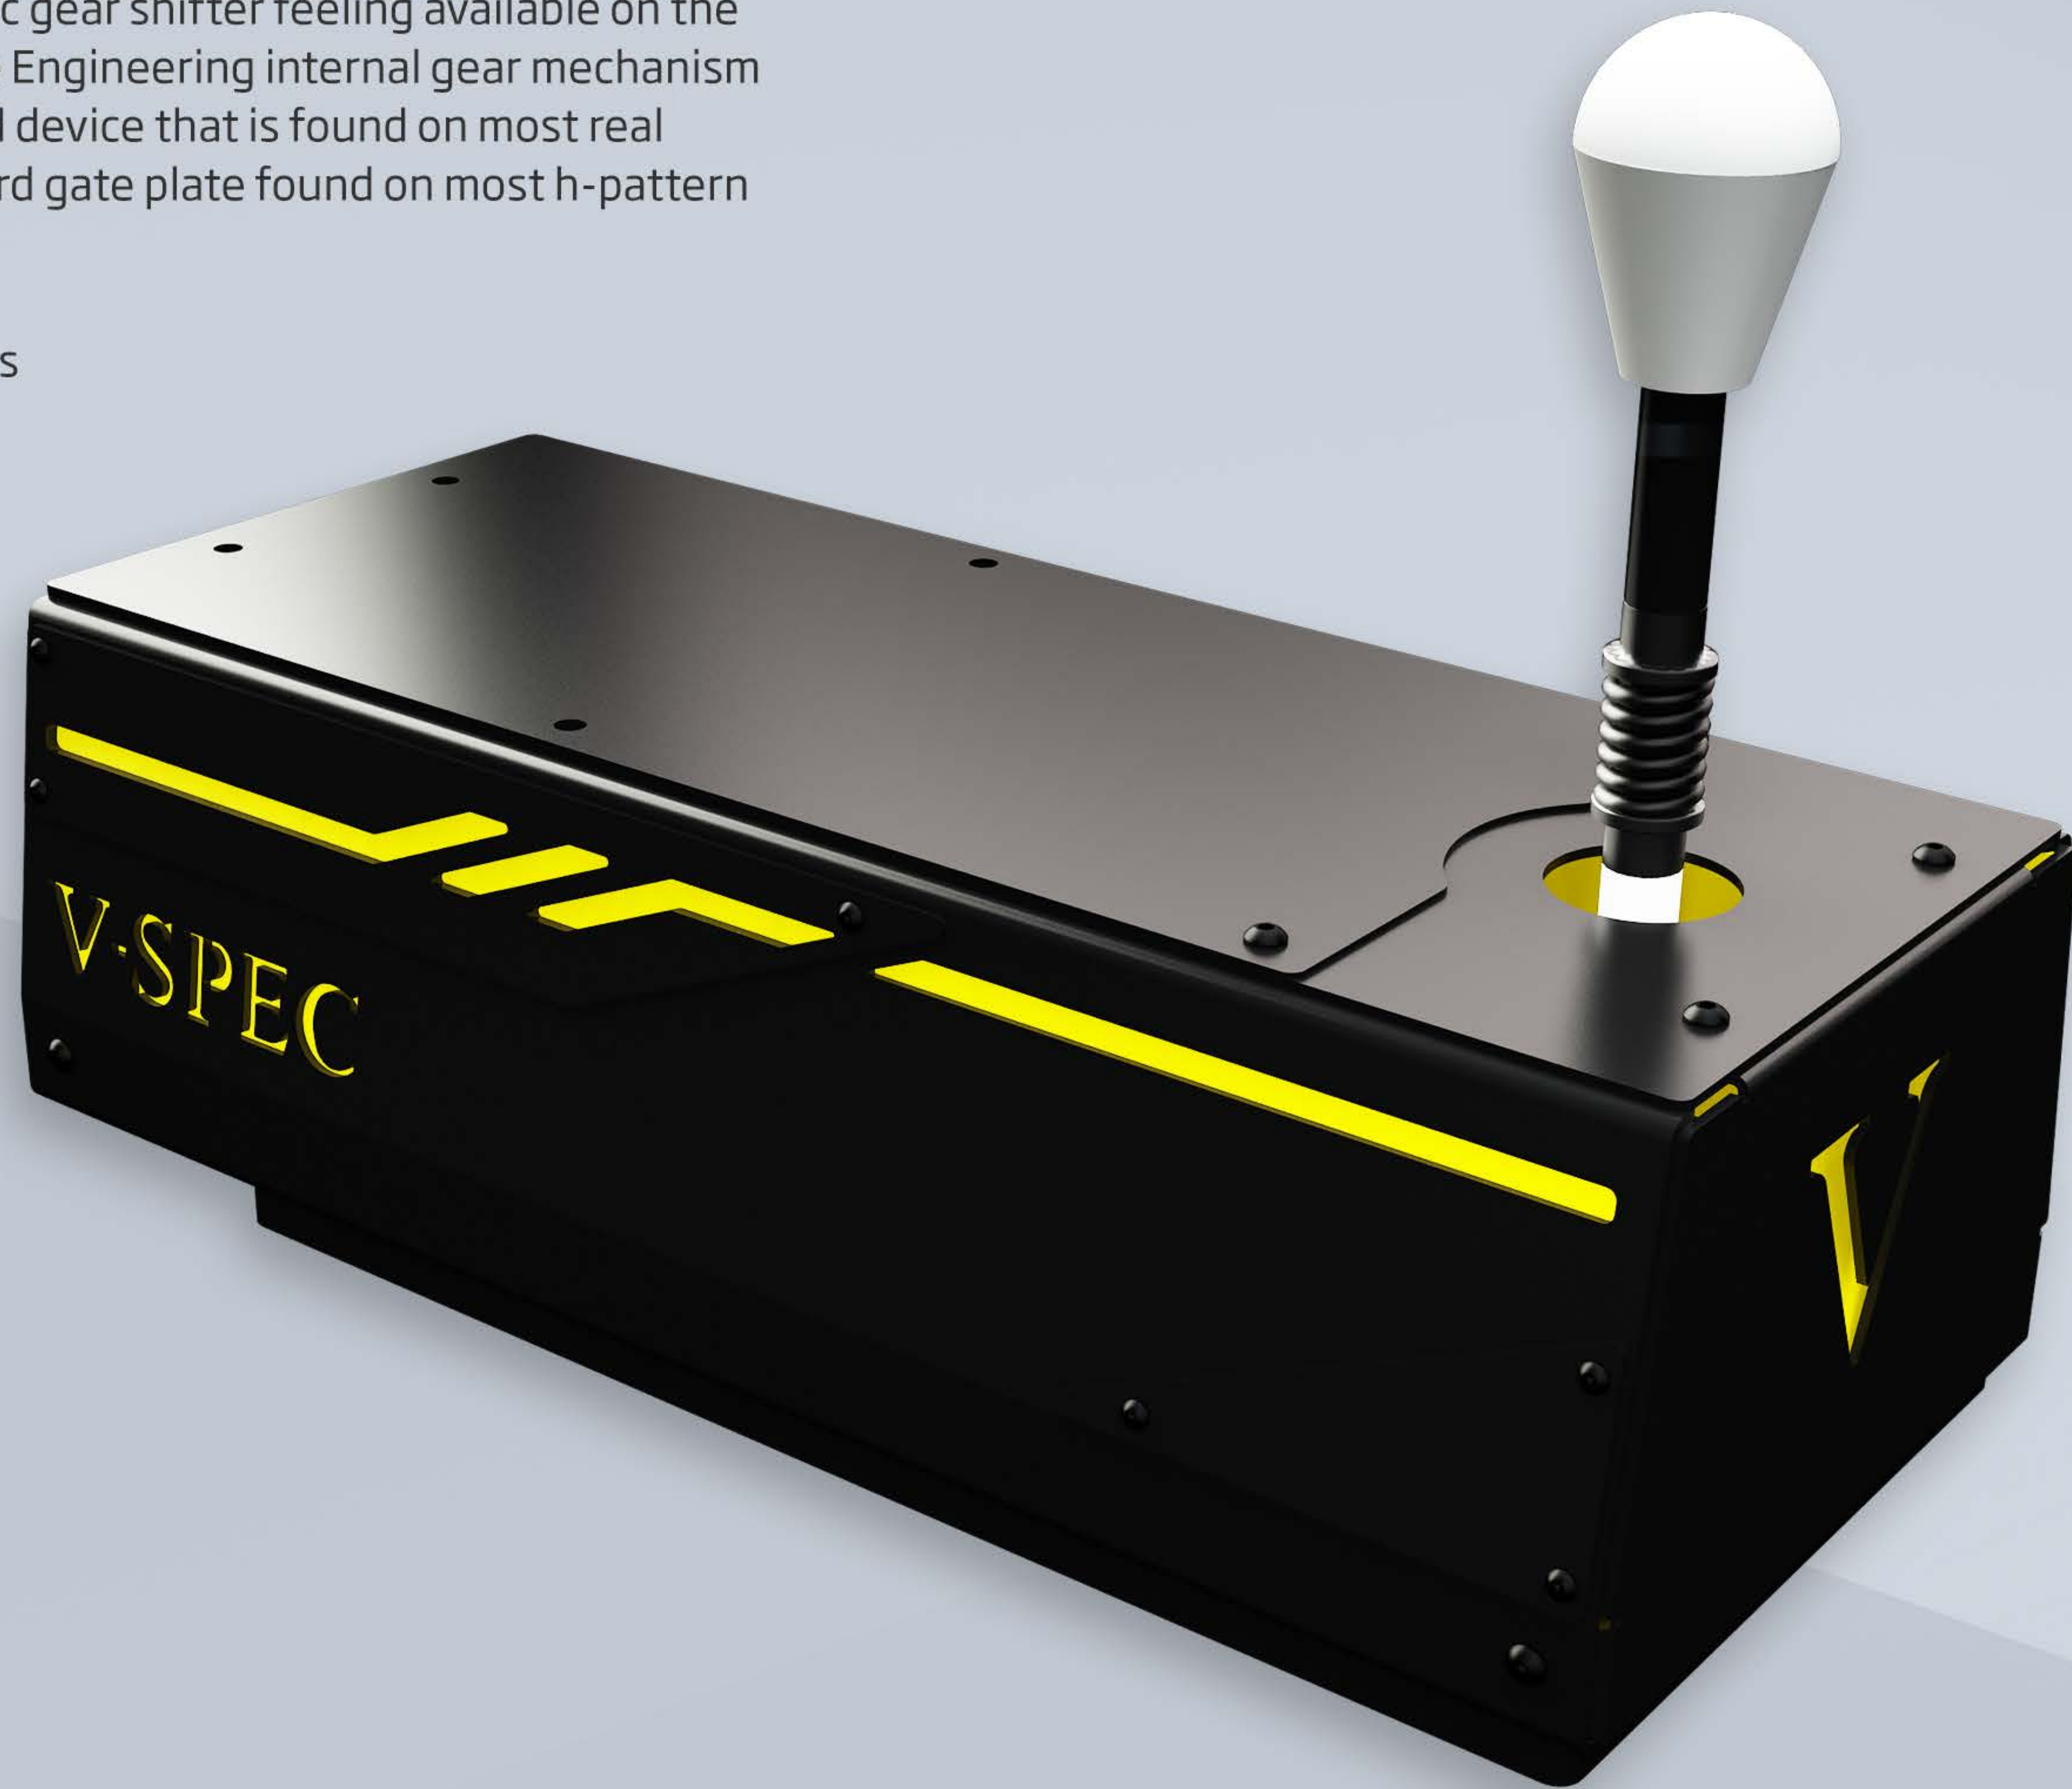

Pro Controls V-Spec H-Pattern shifter

H-Pattern shifter offering the most realistic gear shifter feeling available on the market today. Utilising Pro-Sim and Quaife Engineering internal gear mechanism that utilises selector rods and a centralised device that is found on most real world gearboxes as apposed to the standard gate plate found on most h-pattern shifters.

8 Speed with 6 forward and 2 reverse gears allowing reverse forward or backwards.

Mount on left or right side of the rig.
Commercial grade construction

Pro Controls V-Spec Sequential Shifter

Professional sequential shifter. Full metal construction offering a solid shift feeling ideal for any sequential vehicles or rally applications.

Mount on left or right side of the rig.

Pro Controls V-Spec Extreme Sequential Shifter

Professional sequential shifter with neutral engage lever. Full metal construction offering a heavy duty shift feeling ideal for any sequential vehicles or rally applications.

2 buttons, toggle switch and rotary switch.

Mount on left or right side of the rig.

Pro Controls V-Spec Handbrake

A commercial grade handbrake for rally, drifting and driving simulation style applications.

The handbrake can be horizontal or vertically mounted. to suit your preference.

The lever actuates a 120kg load cell, resulting in up to 22kg of actual force measured at the lever

Using Smart Control software, you have complete freedom to set custom non linear output curves

All structural parts are CNC precision laser cut steel with a bead blasted or fine structured powder coat finish

A 2 stage spring system provides resistance when pulling the lever. An initial metal coil spring simulates the pad to disc gap or slack on the handbrake cable. The main loading on the handbrake is simulated by compressing the elastomers, giving an unprecedented progressive brake feel.

The Sim Handbrake comes with a powerful configuration tool that allows you to set up the handbrake. Smart Control allows for instant mapping of (non linear) output curves, dead zone and handbrake force. All settings can be saved into profiles and can be loaded up again in a few mouse clicks.

Included with the handbrake: Three elastomers, soft, medium and stiff, adaptor plate with yaw adjustment for aluminium profiles and a USB cable to connect the handbrake to a PC

Pro Controls V-Spec GT1 Wheel

Professional wheel rim compatible with our Pro Controls direct drive wheel bases and featuring a n integrated colour display screen shwoing vital information in clear line of sight.

The wheel uses an authentic Sparco racing rim and has carbon fibre paddle shifters with magenetic retraction for a solid and responsive gear change.

- 310mm Lightweight Sparco GT rim
- Motorsport quality carbon fibre shifter paddles
- 6 High quality Knitter pushbuttons
- 2 Toggle switches (2 way)
- 2 Rotary encoders

Pro Controls V-Spec GT3 Wireless Wheel

Professional wireless wheel rim compatible with our Pro Controls direct drive wheel bases

The wheel uses an authentic Sparco racing rim and has carbon fibre paddle shifters with magnetic retraction for a solid and responsive gear change.

- 8 x High Quality Pushbuttons
- 2 x Two-Way toggle switches
- 2 x Rotary Encoders
- Anodised Aluminium Construction
- Motorsport Quality Paddle Shifters
- Rugged Coiled USB cable with panel-mounted inline Connectors
- Battery Status LEDs
- Long-Life Lithium Polymer battery.
- 2 x Pre-Paired Wireless Receivers
- Retractable USB charging Cable

Pro Controls V-Spec LMP Wheel

Professional wireless wheel rim compatible with our Pro Controls direct drive wheel bases

Designed for modern LeMans racing cars.

- 300mm Diameter
- Moulded Polyurethane grips
- Rigid Aluminium Chassis
- 12 pushbuttons
- 2 toggle switches
- 5 Rotary Switches
- Snap Action Gear Shifters with carbon paddles.
- Motorsport coiled cable
- PC Use only

Pro Controls V-Spec Formula Extreme

Professional wheel rim with integrated colour display, designed for professional and commercial use as well as customers requiring the highest quality materials, authentic feeling and features to suit the most demanding simulation application requirements.
